Industry Intel

General contractors operate in the construction industry and oversee the building of single family or multifamily homes as well as commercial and industrial buildings. The businesses are responsible for coordinating and overseeing the construction process and for hiring subcontractors who perform the actual construction. General contractors typically earn a fee that is set as a percentage of the value of the building project. These business owners typically have a good understanding of the construction process as well as a solid business knowledge and they also know the local zoning codes and regulations. Management staff members at a general contracting business usually have a college degree.

These businesses typically secure jobs by submitting responses to requests for proposals and they may also make presentations to government agencies during the bid process. General contractors may maintain home offices in one region and travel to job sites and hire local subcontractors in other regions to complete work – especially if

the project requires special expertise such as the construction of a medical research building.

Business prospects for general contractors are linked to general economic conditions and to the housing market. Many contractors believe that the nation's infrastructure such as highways, public buildings and bridges need replacement and repair and funding allocated for these projects will increase business for general contractors. The Infrastructure Investment and Jobs Act, passed in 2021, provided a major boost to the construction industry. This legislation allocated substantial funding for infrastructure projects, creating numerous opportunities for general contractors.

General Contractors in New York, NY

Cost Breakdown

Typical Range	$3,030 - $26,300
Typical Residential Remodel/Addition	$3,030 - 26,300
Kitchen or Bath Renovation	$6,500 - 32,000
Contractor Hourly Rate	$50 - 150

SOURCES: HomeAdvisor, HomeAdvisor, Thumbtack

Key Factors

- Type and scope of project
- Square footage and complexity
- Material and labor costs
- Permitting and licensing requirements
- Experience level of contractor
- Project timeline and schedule constraints
- Seasonality and demand in the market

Average Household Spend

$1,260

> *Households hiring general contractors in New York typically spend about $1260 per year averaged over a decade (one major project every 8 years, with 4 minor repairs per decade).*

Source: HomeAdvisor (spend averaged from project costs)

Home-Remodeling in New York, NY

Cost Breakdown

Typical Range	$18,900 - $75,600
Kitchen Remodel	$14,000 - 40,000
Bathroom Remodel	$9,000 - 25,000
Bedroom/Other Room Remodel	$5,000 - 15,000
Basement Remodel	$25,000 - 75,000

SOURCES: HomeAdvisor, HomeAdvisor, HomeAdvisor, HomeGuide, HomeAdvisor

Key Factors

- Project scope (full home gut vs individual rooms)
- Material and fixture quality
- Labor costs (higher in NYC)
- Permitting and code requirements
- Home size and age
- Complexity of design and custom features

Average Household Spend

$5,400

> *Estimated as total major remodel ($54000 average) divided by 10 year remodel cycle; typical NYC households remodel major areas every 10 years, plus allow for partial annual spend on smaller updates.*

Source: Angi

Custom-Home-Builders in New York, NY

Cost Breakdown

Typical Range	$300,000 - $900,000
Site Preparation & Foundation	$15,000 - 100,000
Framing	$30,000 - 180,000
Exterior Finishes	$40,000 - 180,000
Major Systems (Plumbing, Electrical, HVAC)	$40,000 - 140,000
Interior Finishes	$70,000 - 350,000

SOURCES: HomeGuide, HomeAdvisor, This Old House

Key Factors

- Size and square footage of the custom home
- Complexity of architectural design
- Choice of materials and finishes
- Local labor rates
- Land costs in New York area
- Building permits and inspection fees
- Site accessibility and preparation needed
- Major systems and energy efficiency features
- Customization level and change orders

Average Household Spend

$10,000

> *Assumes custom home construction is an infrequent, major purchase. The $10000 figure reflects amortized annual spend over a 10-year period for an average buyer. Most households build or move into a new custom home only once in decades.*
