Medical Clinics

Includes category intelligence for medical clinics, including retail clinics, convenient care clinics, and specialty clinics.

Industry Background

Primary NAICS Code: *621493*
Freestanding Ambulatory Surgical and Emergency Centers

Primary SIC Code: *8011*
Offices and Clinics of Doctors of Medicine (ambulatory surgical and emergency centers)

Industry Intel

Medical clinics include the subcategory of retail clinics, which offer walk-in medical attention and other medical outpatient services. A retail clinic is a health center or kiosk that addresses minor health care needs at the patient's convenience. Retail clinics typically employ certified nurse practitioners (NPs) and/or physician assistants (PAs) to administer treatment. Retail clinics are usually located at big-box stores, as well as in pharmacy chain locations.

Like most medical facilities, medical clinics usually bill insurance and may be Medicare and/or Medicaid-certified.

These businesses evolved as a result of insurance company demand to treat patients more cost-effectively through outpatient processes. Retail-based clinics contribute to reducing healthcare costs by managing approximately 30% of cases that would otherwise require more expensive emergency room visits. However, as hospitals are increasingly emphasizing outpatient services, retail clinics are now competing with hospitals, as well as urgent care centers.

As costs pressures continue in the health care industry, the business model of retail clinics will continue to evolve. There are approximately 1,800 retail clinics in the U.S. Over 90% of retail clinics are owned by six organizations. About 85% of clinics are owned by large retail chains.

In 2023, the U.S. retail clinics market was valued at approximately $2.6 billion.

[Sources: CCAClinics.org, n.d. Web. 26 Feb. 2025.; Healthline.org, n.d. Web. 26 Feb. 2025.; " How many retail clinics are in the U.S? " DefinitiveHC.com, 17 Jul. 2024. Web. 26 Feb. 2025; "U.S. Retail Clinics." FortuneBusinessInsights.com, 10 Feb. 2025. Web. 27 Feb. 2025.]

Establishment+Employment Count

There are estimated to be 1,016 companies of this type (*Outpatient care centers*) in the state of Minnesota employing approximately 25,007 people.

Items commonly offered by Medical Clinics

- Short wait times
- Ear & eye exams
- Diabetes center
- Allergy testing
- School/employment physicals
- Wellness classes
- Emergencies
- Telehealth services
- Mammography
- Vaccinations
- Physical therapy

Related Industries

HYPERBARIC SERVICES

Hyperbaric services involve using specialized chambers to administer hyperbaric oxygen therapy (HBOT), where patients breathe pure oxygen in a high-pressure environment. HBOT is used to treat conditions like decompression sickness, carbon monoxide poisoning, and non-healing wounds. Emerging trends are use for anti-aging and overall wellness improvement.

These services are offered in a variety of environments, primarily in hospitals and medical centers. There are some standalone locations that only offer HBOT services. Overall, there are approximately 1,500 hyperbaric facilities in the U.S.

Note that there is some concern about the safety of "mild hyperbaric" treatments offered at wellness centers and spas. These "low-pressure" treatments are typically unsupervised by physicians and are not approved by the FDA.

Patients are typically referred to hyperbaric services by health care providers, highlighting the importance of medical networks. Many providers also partner with hospitals to streamline referrals and improve service offerings. Effective communication about the benefits and risks of HBOT is crucial for attracting patients and securing referrals, requiring continuous outreach and education.

Competition among service providers, including independent clinics and hospital-based centers, is driven by treatment specialization, patient care quality, and facility reputation.

Hyperbaric services are expected to grow steadily due to the rising prevalence of chronic wounds, diabetic foot ulcers, and conditions requiring specialized care. The aging population and increasing diabetes rates will drive demand, while advancements in technology and treatments will improve outcomes. However, challenges like reimbursement issues and regulatory changes could affect profitability.

[Sources: Gupta M, Rathored J. "Hyperbaric oxygen therapy: future prospects in regenerative therapy and anti-aging." Front Aging. 2 May 2024. Web. 26 Feb. 2025; IdahoStatesman.com, n.d. Web. 26 Feb. 2025.]

IV SERVICES

These businesses provide hydration fluids and vitamins through intravenous (IV) devices in clinic settings. IV clinics provide treatments for rehydration, energy boosting, wellness, skin health, hangover recovery, and athletic performance. They also address medical conditions like dehydration and vitamin deficiencies. Known for their convenience and fast results, some clinics offer mobile services.

The cost of IV vitamin therapy varies, with basic hydration drips typically priced between $100 and $150, while custom treatments with added nutrients can range from $250 to $500 per session.

There are nearly 490 of these businesses across the country, and they generate revenue of approximately $2.1 billion. There are no federal regulations for IV therapy; each state has its own rules for practitioners to follow. [Sources: "Intravenous (IV) Hydration Centers in the US." IBISWorld.com, n.d. Web. 27 Feb. 2025; "Are IV Vitamin Infusions Worth the Hype?" VegNews.com, 25 Feb. 2025. Web. 27 Feb. 2025.]

LABORATORIES

Operators in the diagnostic and medical laboratories industry are an integral part of patients' medical evaluation and treatment. Laboratories are vital to the healthcare market, as industry operators provide health care practitioners with information concerning the onset, severity and cause of patients' ailments and illnesses. Clinical and diagnostic labs perform routine and advanced medical testing (chemistry, hematology, molecular diagnostics, cytology).

Many hospitals and physician groups maintain their own labs. Two other major types of labs are independent and other (based in nursing homes or ambulatory care centers).

The diagnostic and medical lab testing industry generates about $90.9 billion in revenue and includes approximately 35,344 businesses.

Major clients for laboratories include:

- Hospitals
- Assisted care facilities
- Managed care organizations
- Health plans and employers
- Other institutions such as government agencies or businesses
- Physicians/physician groups
- Patient and consumers

Direct-access-testing (DAT) continues to grow as patients seek the most convenient and cost-effective lab services provider.

Limited-Time Opportunities+Shareables

Medical Clinics to Promote National Influenza Vaccination Week

Experts are encouraging consumers to stay vigilant regarding viruses that begin to circulate in the fall in the Northern Hemisphere. This year, medical professionals believe RSV, COVID and influenza will drive consumers to their health care professionals to seek relief from the symptoms of these illnesses. Medical clinics and other health care providers are advertising the availability of the latest vaccines. In particular, the influenza vaccine is engineered every year to be as effective as possible against the strains of the virus that are circulating among people. Medical clinics can remind consumers to get their shots during National Influenza Vaccination Week, which will be observed from December 6 to December 12.

Medical Clinics To Advertise Diabetes Screening

While 10% of U.S. adults have been diagnosed with Type 2 diabetes, another 2.8% likely have the disease and don't know it. The longer the disease goes undiagnosed and untreated, the more damage it can do the cardiovascular and nervous systems. In addition, diabetes can cause blindness and kidney failure. November is American Diabetes Month. Doctors and medical clinics can raise awareness of the disease and encourage consumers, especially those over age 65, to be tested. The earlier a patient is diagnosed, the sooner treatment can begin to delay or prevent complications from Type 2 diabetes.

Medical Clinics to Promote National Influenza Vaccination Week

The National Influenza Vaccination Week was established in 2005. Observed during the first full week in December, the event is designed to encourage consumers to get a flu shot before the season begins. Most years, flu outbreaks occur between late December and February. Getting the shot a little early is important as the vaccine needs up to two weeks to activate in the human body. Each year, producers adjust the vaccine to be effective against the anticipated strain of the flu virus. In recent years, up to 20% of kids below age 5 had the flu, while 10% of 18-to-49-year-olds fell ill. Complications from the seasonal flu can be severe and include bacterial pneumonia. Medical clinics and drug stores should promote the flu vaccine clinics they will be holding this year.

Consumers engage with a variety of media types when it comes to health care. The following is a snapshot of health-care marketing engagement:

Search Behavior and Research Habits

- 65% of patients search online before contacting a doctor.
- 70%+ of U.S. patients read online reviews before choosing a new doctor.
- 72% only choose doctors with 4-star reviews or higher.
- 65% of people Google symptoms before seeing a doctor.
- 1 in 5 Americans consult TikTok before visiting a health care provider.
- 50% of Americans have bought a health product after seeing it on social media.
- 34% turn to social media influencers for advice on anxiety and weight loss, and 33% for depression.

Email Engagement

- 41% average open rate for healthcare email campaigns.
- 2.6% average conversion rate from health care emails.

Expectations & Responsiveness

- 91% of patients expect a reply within 4-24 hours after contacting a provider.
- 47% of patients leave providers due to unsatisfactory experiences.
- 81% of patients feel heard through health tech (AI, wearables, online portals).

HEALTHCARE MARKETING

Healthcare practices are entering 2026 with rising marketing budgets, expanding digital strategies and increased adoption of artificial intelligence tools. 62% of practices expect their marketing budgets to increase in 2026, while another 29% expect budgets to remain stable.

Investment is increasingly shifting toward digital-first channels:

- 58% plan to increase influencer marketing spending.
- 50% plan to increase email marketing spending.
- 48% plan to increase paid social advertising.
- 48% plan to increase video marketing.

Practices are also experimenting with new communication formats to engage patients more directly:

- 33% plan to test SMS/text marketing for the first time in 2026.
- 32% plan to test email marketing for the first time.
- 31% plan to test organic social media initiatives for the first time.

Despite growing digital adoption, traditional advertising remains highly valued. Practices ranked their 2026 budget priorities as follows:

1. Traditional marketing (TV, radio, print, billboards)
2. Paid/organic social media
3. Video/content marketing
4. Pay-per-click advertising

Artificial intelligence is rapidly moving beyond content generation and becoming integrated into both marketing operations and patient intake workflows. Survey results show widespread adoption of AI-powered tools:

- 67% of practices use AI for personalizing campaigns or improving customer experiences.

- 59% use AI for attribution or ROI measurement.
- 54% use AI for automating customer communication such as chatbots, emails, and SMS.
- 53% use AI for lead scoring or qualification.

Only 31% of practices cited HIPAA compliance as a major challenge related to AI usage, reflecting growing confidence in tools that provide PHI redaction, encrypted storage, role-based access, and stricter data controls.

As marketing investments generate more patient inquiries, many healthcare practices are struggling to keep pace operationally. 63% of organizations identified lead follow-up and conversion as their primary bottleneck entering 2026.

Most practices still rely heavily on manual intake processes:

- 58% rely on front-desk staff to handle intake directly.
- 49% route web form submissions to general email inboxes.
- 45% use centralized phone systems with call routing.

Despite increased marketing investment, many healthcare organizations still lack confidence in attribution and campaign measurement. Only 51% of practices reported being “extremely confident” that they understand which channels generate their best patients.

Operational maturity appears closely tied to attribution confidence:

- 84% of highly confident practices report efficient approval processes.
- 72% of practices overall report similar operational efficiency.

Note also that patients now initiate contact across multiple communication channels:

- 58% first contact practices by phone.
- 48% use email.
- 47% submit web forms.
- 45% use chatbot or live chat systems.

Know the Customers

Target Customers

These businesses market their services to consumers seeking convenient, accessible health care services for non-life-threatening issues. Urban and rural areas often lack accessible clinicians and health care facilities and services, and retail clinics can cater to these consumers.

These clinics also market to those who do not have a primary care provider. Approximately 25% of Americans say they don't have a primary care doctor.
[Source: "Americans turning to convenient care centers, study finds." DrugstoreNews.com, 27 Jun. 2024. Web. 26 Feb. 2025.]

Young adults are the age group most likely to have no regular health care provider: Over half of individuals aged 29 and younger report not having a primary care physician.
[Source: Abrams Kaplan, Deborah. "Talking About the Generations:The health and healthcare of boomers, Gen Xers, millennials and Gen Zers. Part 4, Gen Z." ManagedHealthCareExecutive.com, 16 Apr. 2024. Web. 26 Feb. 2025.]

The generation breakdown for consumers who seek these clinics for care is as follows:

- Gen Z – 56%
- Millennial – 54%
- Gen X – 40%
- Boomers – 35%

According to a FAIR Health Report, women are more likely to go to alternative care sites than men.
[Source: "Retail Clinic Utilization Increased 51% Nationally (FAIR Health Report)." Concierge Medicine Today. conciergemedicinetoday.org, 3 Apr. 2023. Web. Nov. 2023.]

Target Customers by Mile Radius

Most customers are drawn from a 20 mile radius.

The American Medical Association and Health Affairs often indicates that most consumers are willing to drive between 5 to 20 miles for primary care or retail clinics.
[Source: SalesFuel, 2025]

Top Factors People Consider When Choosing This Type Of Account

- Convenient hours
- Location
- Price transparency
- Availability
- Walk-in appointments
- Short wait times
- Primary care
- Specialty care
- Telehealth
- Remote patient monitoring
- Customer service
- Cultural competence

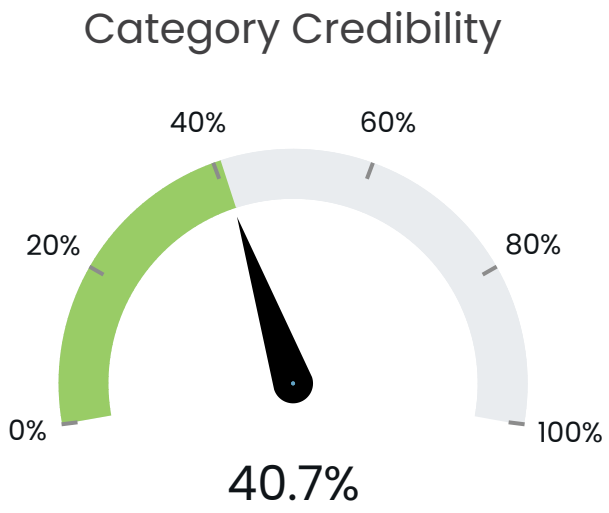

Insurance acceptance also may impact consumers' decision to visit one of these businesses.

78% of individuals have visited a convenient care facility at least three times in the past year, with more than half opting for a walk-in clinic.

A survey found that Americans choose convenient care facilities over their primary care doctor are immediate availability, faster service and a convenient location. These factors contribute to 37% of respondents preferring a visit to a convenient care facility instead of their regular doctor's office. [Source: "Americans turning to convenient care centers, study finds." DrugstoreNews.com, 27 Jun. 2024. Web. 26 Feb. 2025.]

Category Trust+Credibility

> *40.7% of U.S. Adults believe the marketing practices of hospitals and health care systems are credible*

	Audience	All Respondents	Difference
65+	**28.5%**	21.6%	**+32%**
55-64	19.4%	18.5%	+5%
35-44	17.1%	18.2%	-6%
45-54	14.6%	15.8%	-8%
18-24	7.8%	9.6%	-19%
25-34	12.6%	16.6%	-24%

"More likely" or "less likely" than the average U.S. adult 18+.

Credibility - and whether a person has it or not - determines who you trust for guidance and information you use to make decisions in your everyday life. The four components of credibility for any human being are (1) being known, (2) being likable, (3) being helpful, and (4) being trustworthy. Credibility is gained (or lost) by what one says, how they say it, what they do and, finally, what others say about them. Having credibility also requires having others' best interests at heart.

SOURCE: 2026 State of Credibility 2026 Methodology

Trust Drivers

59.3% of U.S. adults **do not indicate a belief that the marketing** of hospitals and health care systems is credible. The following responses are from this audience of consumers.

> *What are the best ways for a company to demonstrate their credibility, trustworthiness and value through their marketing practices?*

Marketing Practice	Audience
Being transparent about what their product or service can and cannot do	63%
Showing real customers and authentic experiences rather than overly polished or staged advertising	60.5%
Making pricing, fees and terms easy to find without having to dig for them	53.4%
Clearly disclosing when their content is sponsored, paid or AI-generated	45.5%
Responding publicly and personally to negative reviews rather than ignoring them	43.4%
Providing and standing behind a clear, easy-to-use refund or satisfaction guarantee	43.1%
Showing the real people behind the business rather than hiding behind a brand	36.5%
Being visibly involved in and giving back to their community	35.1%
Being findable and well-represented across Google, AI search and review platforms	24.8%
Emailing, calling and/or texting me less often	18.3%
Displaying third-party recognition such as industry awards, certifications, accreditations, or media coverage	17.7%

> *How do you tell if a company you've never heard of before is legitimate?*

Vetting Method	Audience
I search for them on Google or another search engine.	56%
I look for reviews on sites like Yelp, Trustpilot or Google Reviews.	47.2%
I ask friends, family or colleagues if they've heard of them.	45.9%
I check their Better Business Bureau rating or complaints.	37.6%
I check for their professional-looking website with a physical address and phone number.	35.9%
I ask myself if the offer seems too good to be true.	35.7%
I look for industry certifications, association memberships or if they're licensed in my state.	33.9%
If I have any doubts, I simply move on and look for someone else.	30.1%
I check their social media presence to see how active, responsive and authentic they are.	27.1%
I search for them on an AI assistant like ChatGPT.	16.6%
