# Industry Background

***Primary NAICS Code:*** *621330*
*Offices of Mental Health Practitioners (except Physicians)*

***Primary SIC Code:*** *8049*
*Offices and Clinics of Health Practitioners, NEC (mental health practitioners except physicians)*

## Industry Intel

The mental health profession is primarily comprised of psychiatrists, who hold medical degrees, and psychologists, who typically complete up to seven years of post-graduate training, including a PhD or PsyD. Both treat patients using a combination of therapeutic approaches such as talk therapy, experiential methods, and, in the case of psychiatrists, medication. In some states, psychologists are also permitted to prescribe medications with additional training and certification.

Mental health professionals treat a wide range of conditions, including depression, bipolar disorder, eating disorders, schizophrenia, and substance use disorders. While some work within hospital systems, others own and operate private practices or outpatient clinics.

Mental health counselors and therapists are related professionals who generally complete less advanced training and often charge lower fees for their services. They frequently work in substance abuse treatment centers, schools, or community settings. Mental health clinics often serve as hubs for integrated care, bringing together counselors, therapists, and, in some cases, psychiatrists.

Subcategories of therapists and counselors include:

- Community mental health centers: Government-funded clinics serving low-income populations.
- Private counseling clinics: Fee-for-service practices with multiple counselors.
- Integrated clinic services: Blend counseling with psychiatry and medical care.
- Teletherapy clinics: Virtual-first or hybrid delivery models.
- Specialty clinics: Focus on autism, intellectual and developmental disabilities or substance use.

The U.S. behavioral health market reaches $94.82 billion in 2025 and is projected to grow to $165.38 billion by 2034 at 6.4% CAGR. Behavioral therapists generate $18.9 billion in 2025 at 8.5% CAGR. The U.S. has over 279,811

mental health professionals including 198,811 therapists and 81,000 psychologists. They work across roughly 166,400 offices.

**Items commonly offered by Mental Health Professionals**

- ADD & ADHD services
- Biofeedback
- Eating disorders
- Pediatric & adolescent
- Holistic healing
- Teletherapy
- Marriage and family counseling
- Hypnosis
- Grief therapy
- Psychological testing

## Related Industries

TELEPRACTICE

Some professionals in the industry provide services via phone, live chat or some other form of technology. Thanks to the growing sophistication of technology, these businesses are now able to provide a variety of services from a distance, including assessments, supervision, treatment delivery, and consultations. Note that these services are referred to by many names, including telepsychiatry, virtual therapy, teletherapy, and telebehavioral health.

These professionals are held to the same ethical standards as others in the industry. Clients may choose this type of service due to convenience, easy access and cost savings. Additionally, there is a shortage of psychiatrists in different areas of the country, and telepsychiatry is a way to address this issue.

Industry professionals predict that these services will continue to grow. The American Telemedicine Association reports that the number of states requiring that private insurers cover telemedicine just as they would in-person services had doubled in the past four years. Additionally, approximately 34% of employers are offering telebehavioral health services, and that number is predicted to grow. And, in addition to employers, insurers and consumers, telemedicine companies are also working with other providers of medical care, such as Walgreens, to boost participation.

Licensing, regulation and varying state laws are top issues for this industry niche. States typically require these professionals to treat only those who reside in the state in which they are licensed. But, some states work out license reciprocity arrangements.

A survey found that respondents are very open to virtual visits with mental health professionals. 54% say they'd be open to virtual mental health care if it were at the same level of quality as in-person. Respondents believe the top benefits include the bility to attend the session remotely (50%), convenience (46%) and lower costs (45%).

# Top Advertising Media Used

NON-DIGITAL

- Educational webinars and lunch-and-learn sessions: Presentations for primary care providers and hospital staff highlight expertise and establish the practice as a trusted referral partner.
- Referral relationship building: Direct outreach to hospitals and primary care clinics with clear referral forms, dedicated portals and fast communication about appointment availability drives consistent patient flow.
- Printed educational materials: Brochures, one-page handouts and flyers explaining therapy approaches, intake steps and coverage options help potential patients understand services.
- Community events and in-person outreach: Participation in health fairs and community gatherings reduces stigma while building local brand awareness.
- Word-of-mouth and patient referrals: Authentic storytelling from current patients serves as credible endorsement within communities.
- Print advertising in local publications: Newspaper and magazine ads reach local demographics in geographic areas served by the practice.
- Professional networking and conferences: Participation in mental health trade associations and conferences builds relationships with other providers and organizations.

HEALTHCARE MARKETING

Healthcare practices are entering 2026 with rising marketing budgets, expanding digital strategies and increased adoption of artificial intelligence tools. 62% of practices expect their marketing budgets to increase in 2026, while another 29% expect budgets to remain stable.

Investment is increasingly shifting toward digital-first channels:

- 58% plan to increase influencer marketing spending.
- 50% plan to increase email marketing spending.
- 48% plan to increase paid social advertising.
- 48% plan to increase video marketing.

Practices are also experimenting with new communication formats to engage patients more directly:

- 33% plan to test SMS/text marketing for the first time in 2026.
- 32% plan to test email marketing for the first time.
- 31% plan to test organic social media initiatives for the first time.

Despite growing digital adoption, traditional advertising remains highly valued. Practices ranked their 2026 budget priorities as follows:

1. Traditional marketing (TV, radio, print, billboards)
2. Paid/organic social media
3. Video/content marketing
4. Pay-per-click advertising

Artificial intelligence is rapidly moving beyond content generation and becoming integrated into both marketing operations and patient intake workflows. Survey results show widespread adoption of AI-powered tools:

- 67% of practices use AI for personalizing campaigns or improving customer experiences.
- 59% use AI for attribution or ROI measurement.
- 54% use AI for automating customer communication such as chatbots, emails, and SMS.
- 53% use AI for lead scoring or qualification.

Only 31% of practices cited HIPAA compliance as a major challenge related to AI usage, reflecting growing confidence in tools that provide PHI redaction, encrypted storage, role-based access, and stricter data controls.

As marketing investments generate more patient inquiries, many healthcare practices are struggling to keep pace operationally. 63% of organizations identified lead follow-up and conversion as their primary bottleneck entering 2026.

Most practices still rely heavily on manual intake processes:

- 58% rely on front-desk staff to handle intake directly.
- 49% route web form submissions to general email inboxes.
- 45% use centralized phone systems with call routing.

Despite increased marketing investment, many healthcare organizations still lack confidence in attribution and campaign measurement. Only 51% of practices reported being “extremely confident” that they understand which channels generate their best patients.

Operational maturity appears closely tied to attribution confidence:

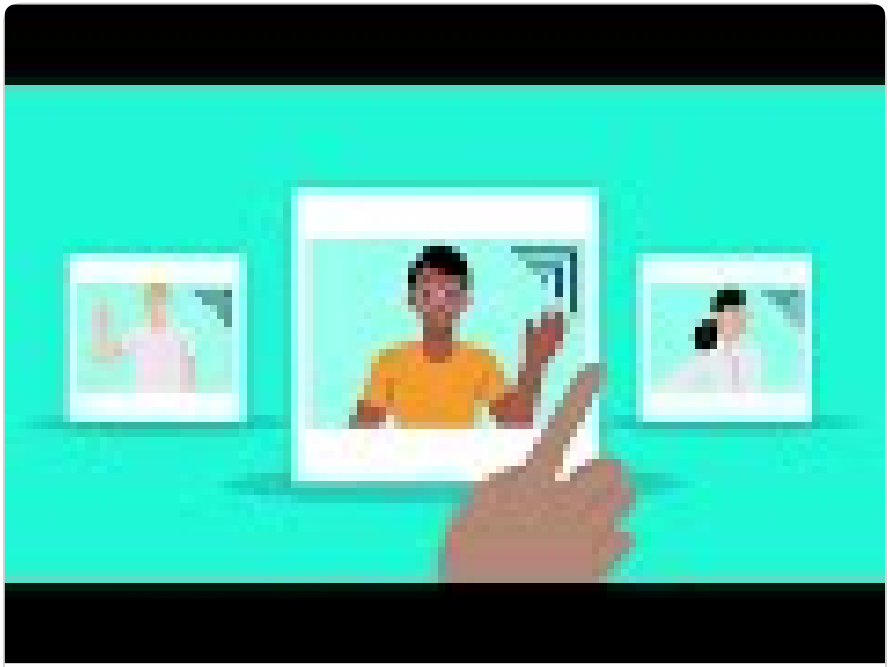

- 84% of highly confident practices report efficient approval processes.
- 72% of practices overall report similar operational efficiency.

Note also that patients now initiate contact across multiple communication channels:

- 58% first contact practices by phone.
- 48% use email.
- 47% submit web forms.
- 45% use chatbot or live chat systems.

# Know the Customers

## Target Customers

Millennials top the list as the primary target for mental health professionals, with 70% planning therapy sessions within the next 12 months compared to only 30% who would not seek care. This generation shows the strongest intent across demographics, driven by comfort sharing with therapists where over two-thirds (72%) feel more at ease than with family or friends. Their high demand makes them the most valuable segment for marketers targeting active therapy seekers.

Young adults ages 18 to 26 rank second, receiving mental health treatment at 26% in 2022, the highest rate among all age groups with a 45% increase from 2019. This group experienced the largest growth in service utilization, reflecting rising awareness and needs amid life transitions like college and early careers. Marketers prioritize them for their rapid expansion and high engagement potential.

Women form the third key segment, nearly twice as likely as men to receive mental health services at 29% in 2022 versus 17% for men. Females also show higher prevalence of any mental illness at 26.4% compared to 19.7% for males, making them a consistent high-volume customer base for therapy and counseling. "

Gen Z youth ages 12 to 26 represent the fourth priority, with 57% planning therapy and 1 in 6 youth aged 6 to 17 experiencing a mental health disorder each year. Adolescents face severe challenges like 19.5% with major depressive episodes, yet 59.8% of those with depression receive no treatment, creating untapped demand.

White adults round out the top five, reporting the highest treatment receipt at 28% in 2022 compared to 16% for Hispanic and Black adults and 9% for Asian adults. This demographic drives the largest current volume of mental health service utilization in the U.S.
[Sources: “Exploring the Rise in Mental Health Care Use by Demographics and Insurance Status.” kff.org, 2025. Web. 31 Dec. 2025; “Mental Health Statistics 2025: Latest Prevalence, PTSD, Anxiety ...” southdenvertherapy.com, 2025. Web. 31 Dec. 2025; “Thriveworks 2025 Pulse on Mental Health Report.” thriveworks.com, 2025. Web. 31 Dec. 2025.]

# Target Customers by Mile Radius

Most customers are drawn from a 15 mile radius.

Patients typically travel within a 15-mile radius for mental health services. Studies show 90% live within 15 minutes drive time of providers. Beyond 30 miles, utilization drops 36% for in-person visits.
[Sources: "Association of travel time with mental health service use in primary ..." pmc.ncbi.nlm.nih.gov, 2022. Web. 31 Dec. 2025; "Why Distance Is So Important for Patient Access, and What We're ..." cypresshealthpartners.com, 2025. Web. 31 Dec. 2025.]

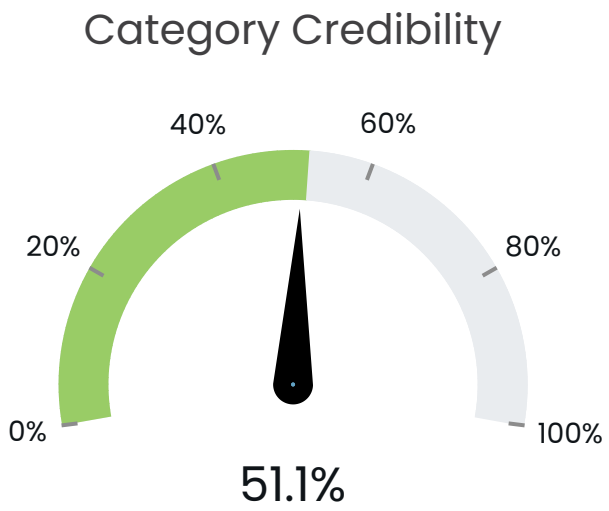

# Top Factors People Consider When Choosing This Type Of Account

- Therapist experience and credentials – Patients prioritize licensed providers with specialized training; 68% check credentials first and 72% seek specialists in their condition. Doctoral-level psychologists and board-certified psychiatrists rank highest due to rigorous education and supervised hours. Verified state licensing is critical.
- Therapeutic fit and personality – Compassion, empathy, and interpersonal skills drive patient satisfaction more than degrees. 85% switch providers if the fit feels wrong, and 62% read reviews focusing on bedside manner before booking.
- Proximity and accessibility – Patients typically travel a 15-mile radius for in-person care; 54% consider convenience important. Telehealth options expand reach, but 47% still prefer local offices.
- Insurance acceptance – 78% of patients verify coverage before contacting providers. In-network status prevents out-of-pocket surprises, and licensing affects eligibility for insurance panels.
- Online reviews and reputation – 75% of patients read testimonials before choosing a provider. Positive feedback on outcomes, ethical practice, and cultural competence outweighs advertising claims.

# Category Trust+Credibility

> *51.1% of U.S. Adults believe the marketing practices of doctors and physicians are credible*

| | Audience | All Respondents | Difference |
|---|---|---|---|
| 65+ | **28.7%** | 21.6% | **+33%** |
| 45-54 | 16.4% | 15.8% | +4% |
| 55-64 | 18.4% | 18.5% | -1% |
| 35-44 | 16% | 18.2% | -12% |
| 18-24 | 8.4% | 9.6% | -12% |
| 25-34 | 12.2% | 16.6% | -27% |

"More likely" or "less likely" than the average U.S. adult 18+.

Credibility - and whether a person has it or not - determines who you trust for guidance and information you use to make decisions in your everyday life. The four components of credibility for any human being are (1) being known, (2) being likable, (3) being helpful, and (4) being trustworthy. Credibility is gained (or lost) by what one says, how they say it, what they do and, finally, what others say about them. Having credibility also requires having others' best interests at heart.

SOURCE: 2026 State of Credibility 2026 Methodology

# Trust Drivers

48.9% of U.S. adults **do not indicate a belief that the marketing** of doctors and physicians is credible. The following responses are from this audience of consumers.

> *What are the best ways for a company to demonstrate their credibility, trustworthiness and value through their marketing practices?*

| Marketing Practice | Audience |
|---|---|
| Showing real customers and authentic experiences rather than overly polished or staged advertising | 59.1% |
| Being transparent about what their product or service can and cannot do | 59.1% |
| Making pricing, fees and terms easy to find without having to dig for them | 50.8% |
| Clearly disclosing when their content is sponsored, paid or AI-generated | 46% |
| Responding publicly and personally to negative reviews rather than ignoring them | 40.3% |
| Showing the real people behind the business rather than hiding behind a brand | 34.2% |
| Being visibly involved in and giving back to their community | 33.8% |
| Being findable and well-represented across Google, AI search and review platforms | 24.9% |
| Emailing, calling and/or texting me less often | 17.9% |
| Displaying third-party recognition such as industry awards, certifications, accreditations, or media coverage | 16.7% |

> *How do you tell if a company you've never heard of before is legitimate?*

| Vetting Method | Audience |
|---|---|
| I search for them on Google or another search engine. | 53.4% |
| I look for reviews on sites like Yelp, Trustpilot or Google Reviews. | 47.3% |
| I ask friends, family or colleagues if they've heard of them. | 41.8% |
| I check their Better Business Bureau rating or complaints. | 37.1% |
| I ask myself if the offer seems too good to be true. | 35.2% |
| I check for their professional-looking website with a physical address and phone number. | 34% |
| I look for industry certifications, association memberships or if they're licensed in my state. | 31.6% |
| If I have any doubts, I simply move on and look for someone else. | 30.6% |
| I check their social media presence to see how active, responsive and authentic they are. | 28.1% |
| I search for them on an AI assistant like ChatGPT. | 14.1% |
