*Plumbing, Heating, and Air-Conditioning Contractors*

***Primary SIC Code:*** *1711*
*Plumbing, Heating, and Air-Conditioning (except environmental controls installation; and septic tank, cesspool, and dry well construction)*

# Industry Intel

Plumbing contractors operate as skilled trades professionals in the building construction, repair and maintenance industry. Plumbers work in the residential, commercial and industrial markets, and they may specialize in specific types of buildings such as hospitals. These professionals typically have either four years of apprentice work or a combination of technical school training and apprentice work that leads to licensure. Plumbers may also specialize in techniques such as pipe fitting and steam-fitting which requires additional expertise in handling gas and other liquids especially in industrial settings. Heating systems, water systems and waste systems all require attention by plumbers.
Plumbers are often union members and may have the opportunity to bid on projects because of union contacts. The plumbing industry is populated by small local contractors.

The plumbing industry includes nearly 128,000 businesses with revenues of $129 billion.

Specifically, plumbing franchises report total revenue of nearly $1 billion and franchise establishments number approximately 2,980.
The highest market share of a single plumbing company is approximately 5%. Reports predict that plumbing service demand will continue to grow during the next five years.

The outlook for the plumbing industry is about equal to the general economic growth outlook. Even during times of slow construction, plumbers experience demand for their services in repair and maintenance.

# Target Customers

Target customers are primarily homeowners, but these businesses also do work for commercial customers, such as building managers.
Plumbing contractors are also likely to maintain a close working relationship with general contractors and work on new homes and remodeling projects.

SNAPSHOT OF HOMEOWNERS

In the fourth quarter of 2025, the homeownership rate was 65.7%. Homeownership rates by demographic are as follows:

- Under 35 – 37.9%
- 35 to 44 – 60.9%
- 45 to 54 – 69.5%
- 55 to 64 – 79.7%
- 65 and older – 79.0%

- Non-Hispanic White - 75.1%
- Hispanic – 48.7%
- Black – 44.2%
- Asian, Native, Hawaiian and Pacific Islander – 63.1%

# Target Customers by Mile Radius

Most customers are drawn from a 35 mile radius. for plumbing contractors.
[Source: SalesFuel.com, 2026.]

# Top Factors People Consider When Choosing This Type Of Account

Consumers are encouraged to consider the following when seeking plumbing services:

- Availability of contracts and fixed pricing
- Availability of warranty
- Reviews/Recommendations/Referrals
- Background/Experience
- On-call/24-hour availability
- Licensing

With most of the contribution being from showers and toilets, the average American consumes 80 to 100 gallons of water daily. Techs can use these statistics to promote water-conserving devices and appliances to help consumers reduce water use and water bills.

In drought-stricken areas, plumbers may increase sales by advertising low-flow toilets to homeowners. These models can be advertised as resource and cost savers.

Online reviews are a major draw for new business in this industry. In addition, these consumers may like mobile-first communication. Businesses can send updates via text or utilizing a two-way chat service.

Relationships between consumers and contractors can be maintained with personalized knowledge of their equipment, like a clear summary including maintenance history and age. Post-pandemic, industry professionals are looking forward to engaging with business partners and customers in-person.

Other personalized experience options include online booking, invoices and payments. GPS technology is also used to give customers a short profile introducing the servicer before arrival at their home, as well as the ability to track technicians, and to be notified when the technician is on their way.
