Senior Living and Care Services

Includes category intelligence for assisted living facilities and other senior living facilities and communities.

Industry Background

Primary NAICS Code: *623312*
Homes for the Elderly

Primary SIC Code: *8361*
Residential Care (homes for the elderly)

Industry Intel

The senior living and care industry encompasses residential communities and services designed to support older adults across varying levels of independence and care needs.

The assisted living segment provides services for seniors who want to remain independent but need help with daily activities. They do not provide skilled nursing care, which sets them apart from other senior care services. They typically serve as a middle step between independent living and nursing homes in the continuum of senior care.

Facilities may be owned by a single provider, managed by a company with financial backing, or leased by an operator from an investment group.

Assisted living facilities are regulated at the state level. The type of care and services offered varies by state. Payment sources include private pay, Medicaid and long-term care insurance.

The U.S. assisted living industry includes about 32,231 communities and nearly 1.2 million licensed beds. The average community has 37 beds. This reflects a mix of small and large operators. The U.S. assisted living facility market is valued at about $48.0 billion

About 56% of communities are part of a chain with two or more locations. About 42% are independently owned.

Items commonly offered by Senior Living and Care Services

- Individual service plans
- Pets welcome
- Wellness programs
- Outdoor spaces
- Electronic health system
- WiFi
- Quality restaurants
- On-staff nurses
- Social and educational programs
- Rehabilitation services
- Safe, secure facility

Related Industries

CONTINUING CARE COMMUNITIES

Continuing care retirement centers (CCRCs) operate in the long-term care industry for the elderly population.

This industry has increased tenfold since the 1980s. The early models included campuses with various types of housing and amenities. Demand has increased for urban CCRCs as well those located in more rural settings.

CCRCs generally fall into two models: entrance-fee communities and rental communities. Entrance fees vary considerably based on the community, residence, contract type and refund provisions, but the average entrance fee for CCRCs surpassed $480,000 in 2025, up from approximately $400,000 in 2020. Entrance-fee contracts typically provide residents with access to a continuum of care, allowing them to transition from independent living to assisted living and skilled nursing as their needs change. Residents may also pay monthly fees for housing, meals, amenities and other services.

Rental CCRCs, which generally do not require a large upfront entrance fee, are an alternative to the traditional entrance-fee model. NIC now tracks both entrance-fee and rental CCRCs, reflecting the growing presence of rental options in the continuing-care market.

Continuing care retirement communities (CCRC) typically offer the following types of contracts:

- Life Care or Extended Contract: This is the most expensive option, but offers unlimited assisted living, medical treatment and skilled nursing care without additional charges.

- Modified Contract: This contract offers a set of services provided for a set length of time. When that time is expired, other services can be obtained, but for higher monthly fees.
- Fee-for-Service Contract: The initial enrollment fee may be lower but assisted living and skilled nursing will be paid for at their market rates.

Entrance-fee CCRCs continued to post higher occupancy than rental CCRCs, although rental communities are gaining ground more quickly. In 4Q 2025, entrance-fee CCRCs had an overall occupancy rate of 92.4%, compared with 90.0% for rental CCRCs, but rental communities recorded a 1.9-percentage-point year-over-year increase versus 1.2 points for entrance-fee communities.

The entire CCRC industry reports revenue of approximately $100.7 billion.

CCRC oversight differs significantly from state to state, with 38 states currently subjecting CCRCs to regulatory requirements administered by a range of state agencies.

Despite the growing need for senior living services, CCRC market penetration remains limited, reaching only about 2.5% of independent living demand and 3%–6% even in the states with the highest CCRC adoption. This relatively low penetration points to significant potential for future market expansion.

NURSING CARE FACILITIES

U.S. nursing care facilities provide residential healthcare and daily living support primarily to seniors and individuals with complex medical needs, serving both consumers and business partners such as hospitals, insurers, and managed care organizations. The market includes skilled nursing facilities, long-term nursing homes, post-acute recovery centers, and chronic care support. The sector is valued at $167.5 billion in 2025, with revenue growing 3.5% over the past year and occupancy rates rising steadily to 84.5% in key markets, reflecting strong demand driven by the aging population. Facilities vary from small private homes to large multi-site operators and can be for-profit or nonprofit, with for-profits focusing on efficiency and a broader service range while nonprofits often target underserved populations.

Skilled nursing facilities provide 24/7 medical care and rehabilitation, nursing homes focus on long-term residential care, and post-acute centers support short-term recovery after hospitalization. Industry trends include ongoing workforce shortages, particularly for direct care staff, accelerating consolidation as larger

operators acquire smaller or distressed facilities, and growing investment in technology such as telehealth and AI-driven care coordination.

Regulatory and funding shifts, including recent increases in Medicare Part A payments and stable or rising Medicaid rates, are shaping business models, while urban and suburban facilities generally see growth as rural facilities face higher closure rates.

Looking ahead, the sector is expected to expand alongside the senior population, with technology adoption, regulatory changes, and acquisitions continuing to reshape operations. Diversified service offerings, including memory care, rehabilitation, and direct contracting with business partners, create new opportunities for media engagement and targeted sales efforts.

As of 2025, the U.S. has roughly 15,000 to 16,600 nursing care facilities. About 16,600 skilled nursing facilities are active and licensed nationwide, while nearly 15,000 are federally certified, including both nonprofit and for-profit providers serving seniors and individuals with disabilities. These counts cover SNFs, nursing homes, and rehab-focused long-term care centers but exclude assisted living and rest homes, which are tracked separately and add tens of thousands more sites to the broader long-term care sector.

INDEPENDENT LIVING COMMUNITIES

These businesses operate in the senior living industry and offer residential services to consumers who are interested in living independently but want specific services taken care of for them. Senior housing complexes may offer special services such as transportation, social activities, communal meals, and 24-hour emergency service. Residents in retirement homes generally do not require skilled nursing assistance.

Residents pay a monthly fee in exchange for housing and services. Fees can range from a few hundred dollars to as high as $5,000. These fees vary based upon level of services being offered, as well as the region the establishment is in and other factors. Offerings typically include:

- Independent and assisted living units

- Meal services
- 24-hour emergency response
- Housekeeping
- Concierge services
- Transportation
- Recreational activities
- Supplemental care services

These homes may be small and target specific populations, especially religious groups.

Retirement housing developed as the result of demographic changes and social trends. Smaller families and working mothers often meant adult children were unable to care for aging parents. Churches and other nonprofit groups stepped in to offer retirement living for the elderly. Gradually the small retirement/rest homes found their roles changing. These independent homes now compete with nursing homes, assisted living centers and continuing care retirement communities.

Centers and communities may focus on only one "level" of care or offer multiple options, which allows residents to make transitions within the community as needed. Those that offer more than one level of care are called continuing care retirement communities (CCRCs).

Independent living communities, otherwise known as retirement homes, have approximately 19,000 businesses and generated $87.1 billion in revenue in 2023. Independent living occupancy exceeded 90% for the first time since 2019. This marks seventeen consecutive quarters of occupancy improvement as demand outpaces new supply.

MEMORY CARE

The memory care industry provides specialized residential care for people with Alzheimer’s disease and other forms of dementia. These facilities offer secure environments, structured routines, and trained staff to support cognitive and behavioral needs. Demand grows as dementia progresses and in-home care becomes unsafe or unmanageable. Memory care is often needed for individuals requiring 24-hour supervision due to wandering, incontinence, or behavioral changes. It also reduces the burden on family caregivers.

Core services include housing, meals, help with daily activities, medication management, and continuous supervision. Many facilities also offer access to medical and mental health professionals.

Costs are high and vary by location, often exceeding $100,000 annually. Payment is mostly out-of-pocket, with some support from long-term care insurance, Medicaid, or veterans’ benefits. Medicare does not cover memory care housing but may cover certain medical services.

21% of assisted living communities have a dementia care unit, wing or floor, and 11% serve only adults with dementia. 9 million Americans are predicted to have some form of dementia by 2030.
[Sources: "Memory care: A senior living option for those with dementia or Alzheimer's disease." health.harvard.edu, 9 Oct. 2024. Web. 5 May 2026; " Move over AL: Nursing homes are pursuing larger share of the memory care market." mcknights.com, 13 Mar. 2025. Web. 5 May 2026.]

Executive Summary

3.6% of US adults said "Eldercare/Nursing home services (for you or a family member)" when asked "When it comes to health and wellness, I intend or expect to pay for these items in the next 12 months..."

Top sales months for Senior Living and Care Services are: November, December, October.

The Annual Advertising/Marketing Budget is Approximately **0.78%** of retail sales - services-nursing & personal care facilities
Industry professionals recommend that these businesses spend 7%-10% on advertising.

24.8% of U.S. adults believe that senior care services/assisted living communities are credible in what they say and do, and have their best interest at heart.

Know the Customers

Target Customers

Residents often require assistance with instrumental activities associated with daily living. Assisted living communities can be age and income restrictive.

The primary target demographic for assisted living facilities in 2025 centers on the baby boomer generation entering their late 70s and early 80s, representing the largest demographic cohort in U.S. history with substantial financial resources and distinct care preferences. The oldest baby boomers reached 79 years in 2025, approaching the average senior living entry age, while thousands more age into the target demographic daily.

Adult children of aging parents constitute crucial secondary customers who often initiate facility research and influence final decisions. This demographic typically ranges from ages 45-65, maintains higher digital engagement, and approaches senior living decisions through extended research processes comparing multiple options.

Memory care prospects represent a specialized high-need segment, with 44% of assisted living residents requiring some level of dementia care, creating opportunities for facilities with specialized programming and staff training.

CONTINUING CARE RETIREMENT COMMUNITIES (CCRC)

CCRCs offer independent living services to seniors who typically do not yet need assistance or support with activities of daily life (ADLs), but who prefer the physical and psychological comfort of a residential community that offers healthcare and other services.

The target market for these communities is persons aged 75 and older, which is one of the fastest-growing segments of the United States population. The average age of new CCRC residents is 82 to 85 years old.

Typically, retirement center/community residents are seniors who desire or need a more supportive living environment. The average resident resides in a retirement center community for approximately 36 months.

To qualify for initial entry, residents generally do not need assistance with day-to-day activities, though some communities do offer extra services, such as meals or housekeeping.

NURSING CARE FACILITIES

- Primary decision-makers: Adult children, mostly women aged 45–64, drive over 70% of initial inquiries and placement decisions; daughters influence nearly two-thirds of incoming residents.
- Resident demographics: Seniors 85+ account for 36% of residents and are the fastest-growing segment; women make up over 63% of all residents. The 65+ population is projected to nearly double to 95 million by 2060.
- Key B2B segment: Hospital discharge planners, social workers, and healthcare professionals drive up to 50% of skilled nursing admissions through referrals.
- Medicaid-insured residents: Lower-income seniors and individuals with chronic disabilities comprise 62% of residents, highlighting the importance of payer-focused marketing and state/managed care collaboration.
- Post-acute/post-surgical patients: Medicare-funded short-stay admissions account for 25–30% of new admissions, targeted via hospital and corporate partnerships.

claconnect.com, 2025. Web. 10 Nov. 2025; "Top Skilled Nursing Trends for 2025." skillednursingnews.com, 2025. Web. 10 Nov. 2025.]

INDEPENDENT LIVING COMMUNITIES

- Active seniors aged 75 to 84 are driving record demand for independent living communities, with occupancy surpassing previous highs.
- Affluent seniors with higher disposable incomes are fueling growth in premium communities that offer wellness and social amenities.
- Adult children aged 50 to 65 researching options for aging parents influence the majority of senior living decisions through online searches and visits.
- Active adults aged 65 to 74 seeking preventive community living prefer hybrid models like independent living lite and 55+ villages, with single-story cottages attracting this healthier cohort.
- Couples and widows prioritize social connection and wellness programs, with many communities emphasizing dining, fitness, and peer engagement to combat loneliness.

[Sources: ccrgrowth.com, 2026. Web. 27 Jan. 2026; datainsightsmarket.com, 2026. Web. 27 Jan. 2026; pwc.com, 2026. Web. 27 Jan. 2026; seniorliving.org, 2026. Web. 27 Jan. 2026.]

FUTURE OUTLOOK

The oldest baby boomers turn 80 in 2026, and the 75+ population is expected to grow by over 4 million by 2030, with those living alone projected to more than double by 2040. By 2033, middle-income seniors will make up 44% of older adult households, shaping demand for diverse senior housing options.
[Source: "Senior Housing." pwc.com, 2026. Web. 28 Jan. 2026.]

Plans to move to an independent living community or a retirement home with professional caregivers vary by generation, retirement status and location. Millennials are most likely to consider moving (15% for independent living), followed by Gen Xers (13%) and baby boomers (6%), with younger boomers aged 60–65 slightly higher (7%). People not yet retired are more likely than retirees to plan a move (14% vs. 6% for independent living).

Residents in rural areas are less likely to plan a move (7%) than those in suburban (14%) or urban areas (12%).
[Source: " People’s plans for senior living vary by generation, retirement status, urbanicity." mcknightsseniorliving.com, 23 Jun. 2025. Web. 28 Jan. 2026.]

Target Customers by Mile Radius

Most customers are drawn from a 10 mile radius. Data shows that:

- 62% of consumers want to move within 10 miles
- 39% want to move less than five miles
- 38% want to move 10+ miles
- 23% want to move 5-10 miles

Top Factors People Consider When Choosing This Type Of Account

Consumers may make choices depending on:

- Initial fees and eventual reimbursement policy of down payment
- Service contracts which range from all-inclusive to moderate contracts to fee-for-service based contracts
- Amenities and quality of housing and level of service
- Location of community
- Staff
- Programs
- Diversity
- Transportation services
- Financial viability of the community
- Reputation

There is major opportunity to educate both potential residents and caregivers about services, especially at each step of the purchase journey. Facilities should position themselves as knowledge sources by providing expert content and tools such as video and content.

NURSING CARE FACILITIES

- Quality of care and clinical outcomes - top factor for families, seniors, and healthcare professionals; 77% of prospective residents' families cite quality ratings as their leading decision factor. CMS Five-Star Quality Ratings, specialized care reputation, post-acute rehab, and low hospital readmission rates heavily influence choice.
- Location and proximity - over 80% of new admissions choose facilities within 15 miles of family or support networks. Ease of visitation and familiarity with the community are key considerations.
- Staffing levels and retention - family decision-makers are 70% more likely to select facilities with higher RN and CNA-to-resident ratios; consistent staffing improves perceived safety, communication, and wellness. New CMS rules emphasize staff turnover and retention in ratings.
- Cost and payer clarity - 62% of U.S. residents rely on Medicaid for long-term stays; families prioritize transparency regarding Medicaid, Medicare, and supplemental fees when evaluating facilities.

- Social environment and amenities - resident activities, private rooms, faith-based programs, and food quality impact final decisions; over 60% of residents and adult children weigh “lifestyle fit” alongside clinical and cost factors.

INDEPENDENT LIVING COMMUNITIES

- Location tops the selection criteria for independent living communities, as prospects prioritize proximity to family, medical providers, and familiar surroundings
- Community amenities and lifestyle offerings are important, with residents seeking fitness centers, dining services, and social programs that match personal interests. 89% of current residents and 87% of future residents want well-being offerings reflecting personal preferences.
- Cost and financial transparency are key considerations, as families compare monthly fees against current expenses for housing, maintenance, and activities
- Staff quality and culture influence decisions, with low turnover and genuine resident interactions signaling reliable service
- Social environment and reputation also influence decisions. 79% of residents move into senior living for social connection, with 83% saying it drives well-being.

Category Trust+Credibility

> *24.8% of U.S. Adults believe the marketing practices of senior care services/assisted living communities are credible*

	Audience	All Respondents	Difference
65+	**32.6%**	21.6%	**+51%**
55-64	19.5%	18.5%	+5%
45-54	16.5%	15.8%	+4%
25-34	12.4%	16.6%	-25%
35-44	13.5%	18.2%	-26%
18-24	5.6%	9.6%	-42%

"More likely" or "less likely" than the average U.S. adult 18+.

Credibility - and whether a person has it or not - determines who you trust for guidance and information you use to make decisions in your everyday life. The four components of credibility for any human being are (1) being known, (2) being likable, (3) being helpful, and (4) being trustworthy. Credibility is gained (or lost) by what one says, how they say it, what they do and, finally, what others say about them. Having credibility also requires having others' best interests at heart.

Trust Drivers

75.2% of U.S. adults **do not indicate a belief that the marketing** of senior care services/assisted living communities is credible. The following responses are from this audience of consumers.

> *What are the best ways for a company to demonstrate their credibility, trustworthiness and value through their marketing practices?*

Marketing Practice	Audience
Being transparent about what their product or service can and cannot do	67.7%
Showing real customers and authentic experiences rather than overly polished or staged advertising	63%
Making pricing, fees and terms easy to find without having to dig for them	56.2%
Clearly disclosing when their content is sponsored, paid or AI-generated	47.6%
Responding publicly and personally to negative reviews rather than ignoring them	45.4%
Providing and standing behind a clear, easy-to-use refund or satisfaction guarantee	45%
Taking a clear, consistent and authentic stand on values without changing them based on trends	39.2%
Showing the real people behind the business rather than hiding behind a brand	38.7%
Being visibly involved in and giving back to their community	37.1%
Being findable and well-represented across Google, AI search and review platforms	26.2%
Displaying third-party recognition such as industry awards, certifications, accreditations, or media coverage	20.9%
Emailing, calling and/or texting me less often	18.5%

How do you tell if a company you've never heard of before is legitimate?

Vetting Method	Audience
I search for them on Google or another search engine.	57.6%
I look for reviews on sites like Yelp, Trustpilot or Google Reviews.	49.4%
I ask friends, family or colleagues if they've heard of them.	45.6%
I check their Better Business Bureau rating or complaints.	39.8%
I ask myself if the offer seems too good to be true.	38.7%
I check for their professional-looking website with a physical address and phone number.	38.6%
I look for industry certifications, association memberships or if they're licensed in my state.	37%
If I have any doubts, I simply move on and look for someone else.	32.3%
I check their social media presence to see how active, responsive and authentic they are.	27.4%
I search for them on an AI assistant like ChatGPT.	15.9%
