Technical and Trade Schools

Includes category intelligence for technical, trade and vocational schools.

Industry Background

Primary NAICS Code: *611519*
Other Technical and Trade Schools

Primary SIC Code: *8249*
Vocational Schools, NEC (except aviation and flight training and apprenticeship training)

Industry Intel

Technical and trade schools provide training and education that leads to the equivalent of an associate's degree and/or licensure in a specific profession such as auto mechanics or licensed practical nursing. These schools may also offer training on general workplace skills and may specialize in one type of training such as cosmetology, or they may offer multiple programs.

Primary segments include:

- Trade and technical schools account for 53% of firms and 50% of industry revenue.
- Cosmetology and barber schools represent 19% of firms and about 12% of industry revenue.
- Flight training schools comprise 12% of firms and 25% of industry revenue.
- Apprenticeship training programs account for about 16% of firms and 13% of revenue.

Providers of technical and training programs operate either as profit or nonprofit organizations and work directly with students as well as with businesses and high schools. Independent schools that are not part of a public school system are privately owned and operated. There is competition among private schools, public schools and programs offered through secondary schools to high school students. Sometimes they may work in collaboration to further student professional development.

The Workforce Innovation and Opportunity Act (WIOA) was signed into law on July 22, 2014. The WIOA is a federally funded program designed to help disadvantaged and younger job seekers access employment, education, training, and support services to succeed in the labor market and to match employers with the skilled workers they need to compete in the global economy.

Funding goes directly to students in the form of grants or scholarship.

The U.S. trade and technical schools industry reached $17.5 billion in revenue in 2025. Revenue grew at a 2.3% CAGR over the past five years. There are 7,625 businesses, up at a 2.0% CAGR from 2020 to 2025. Community colleges hold 54.4% of trade enrollments.

- Convenient locations
- Night and weekend degree programs
- ESL welcome
- Placement office
- Continuing education programs
- Apprenticeship programs
- Remote and hybrid classes
- Tutoring

Related Industries

NURSING SCHOOLS

These schools provide nursing education and offer a mix of baccalaureate, graduate, and post-graduate programs. They may offer accelerated programs as well. Note that the The American Association of Colleges of Nursing (AACN), American Organization of Nurse Executives (AONE), American Nurses Association (ANA) and other leading nursing organizations recognize the BSN degree as the minimum educational requirement for professional nursing practice. Schools may be nationally and/or regionally accredited.

An aging population is boosting demand for nurses, and as more in the industry retire, places throughout the country are experiencing shortages.

Currently, there are approximately 3.1 million nurses practicing in the United States. Nursing students account for more than half of all health professions students.
[Sources: "Your Nursing Career: A Look At the Facts." AACN.com. American Association of Colleges of Nursing]

BEAUTY SCHOOLS

Beauty and barber schools in the United States are vocational institutions that train students for licensed careers in personal appearance services, including hair styling, barbering, skin care, nail care, and related beauty services.These schools sit at the intersection of education and the personal care services sector, providing job-focused programs that prepare graduates for state licensure and direct entry into salons, barbershops, spas, and other beauty businesses. There is clear differentiation between cosmetology and barbering, with barber programs providing more in-depth training on men's hair and facial hair than what is covered in typical cosmetology programs. Separate esthetics and nail technology tracks allow students to focus on specialized services rather than broad cosmetology.

The U.S. cosmetology and barber schools segment has grown to roughly the low single billions of dollars in annual revenue, with recent estimates in the $2–3 billion range. This growth reflects strong demand for beauty services and steady employer need for licensed professionals.

Classes are typically delivered via on-campus, in?person programs with on?site training salons where students practice on mannequins and clients, as well as online and hybrid formats that combine remote instruction with required in?person practical hours, which have expanded since the pandemic. Longer programs may blend cosmetology training with broader business or management education, leading to an associate-level credential.

There are approximately 1,326 schools in this industry. The American Association of Cosmetology Schools (AACS) says it represents over 250 school-owner members that together comprise nearly 700 schools across the United States.

Market leaders in the U.S. include these large school groups and brands:

- Empire Education Group is one of the best-known multi-campus cosmetology school operators in the U.S. and is commonly cited as a leading beauty education brand.

- Paul Mitchell Schools is a major national franchise-style school network with a large U.S. footprint.
- AVEDA Institutes are widely recognized as a premium beauty school brand and operate through a broad network of campuses.

Primary students are career changers and first-time entrants who want a licensed, hands-on path into beauty or barbering. U.S. labor data shows projected job openings of about 84,200 a year from 2024 to 2034, which supports steady demand for training from people entering the field. Program quality and licensing outcomes are the top criteria for prospective beauty and barber school students because they want assurance that their training will lead to a recognized license and real job opportunities. Affordability and financial fit rank next, as many beauty and barber school customers have limited budgets and are sensitive to tuition, fees, and access to financial aid.

Sales % reflect NAPCS collection code sales, value of shipments, or revenue as % of total sales, value of shipments, or revenue of establishments as reported by the US Census and often will not total 100 for all products. When sales % values in the table to not sum to 100, values will be adjusted in the pie chart to reflect a sum of 100%.

Top Advertising Media Used

NON-DIGITAL

- Sponsor events: Schools welcome sponsorships for career fairs and activities to gain name recognition.
- Participate in career fairs: Provides direct face time with students seeking jobs.
- Advertising in school magazines, newsletters or websites: Targets students through dedicated spaces.
- Speaking opportunities and guest articles: Shares expertise and builds in-person networks.
- Donate money, time or equipment: Creates goodwill and displays donor lists.
- Serve on boards or committees: Builds long-term relationships with administration.
- Post hiring info directly with schools: Keeps openings top of mind via calls or emails.

[Sources: "10 Marketing Ideas to Identify and Attract Trade School Students." fraleyconstructionmarketing.com, 2025. Web. 3 Feb. 2026.]

DIGITAL

- Search engine optimization (SEO): Drives organic traffic through program-specific keywords like HVAC training.
- Paid search and Google Ads: Targets high-intent searches for trade careers and certifications.
- Social media marketing: Builds communities on Facebook, Instagram and LinkedIn with student success stories.
- Email marketing: Nurtures leads with course info, open house invites and alumni updates.
- Content marketing: Blogs, videos and guides on career paths and job outlooks.
- Pay-per-click (PPC) advertising: Runs targeted ads on Google and Meta platforms.
- Web analytics and optimization: Tracks site performance to improve conversions.
- Social media ads: Precision targeting for local high school grads and career changers.

Know the Customers

Target Customers

- High school graduates aged 18 to 24 years old form the top customer segment for technical and trade schools. They make up 65.4% of enrolled students and have driven the 20% enrollment surge in vocational public two-year programs since 2020, reaching 871,000 students in spring 2025. Gen Zers favor hands-on training over traditional college amid rising debt concerns.
- Career changers aged 25 to 34 years old rank second. They represent 14.9% of students and seek quick skills for better pay, with trade enrollment growing 4.9% from 2020 to 2023 versus university declines. This group values short programs amid labor shortages.
- Hispanic or Latino young adults aged 18 to 24 come third. They account for 20.3% of postsecondary students, with enrollment up 483% since 1976. They are drawn to affordable trades amid economic pressures.
- Black or African American students aged 18 to 24 comprise 12.5% of enrollments, up 3.1% since 1976.
- Adult learners aged 35 and older account for 8% of students, including career switchers including baby boomers and Gen Xers.

[Sources: "College Enrollment Statistics [2026]: Total + by Demographic." educationdata.org, 2026. Web. 3 Feb. 2026; "Vocational-Focused Public 2-Years Lead Spring Enrollment Rise." studentclearinghouse.org, 2025. Web. 3 Feb. 2026.]

Target Customers by Mile Radius

Most customers are drawn from a 25 mile radius. Primary customers of technical and trade schools live within a 25-mile radius. Most undergraduate students attend college within 25 miles of home, with 69% staying under 50 miles. Trade schools draw even more locally due to hands-on needs.
[Source: TICAS.org]

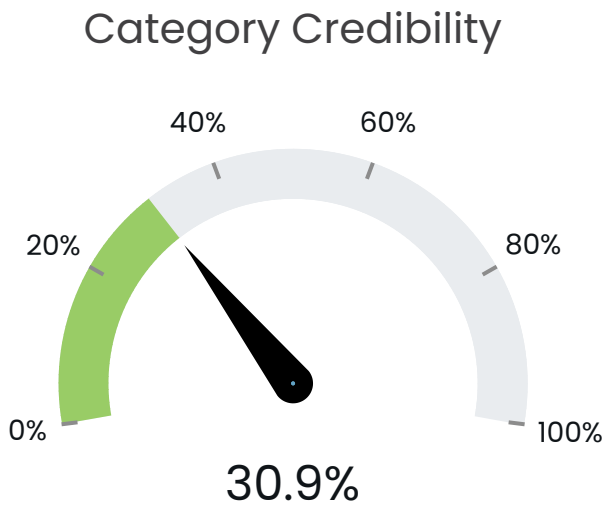

Top Factors People Consider When Choosing This Type Of Account

- Job placement rates and employer partnerships top the list of selection criteria for technical and trade school customers. Students prioritize schools with strong outcomes and active industry ties that lead to apprenticeships and hires.
- Accreditation by recognized bodies is important as customers seek programs respected by employers. Verified standards ensure quality training and credential value.
- Modern facilities and hands-on training equipment matter because trade programs demand practical skills, and customers look for up-to-date labs with 60%-70% shop-time ratios to prepare for real-world work.
- Cost and financial aid options strongly influence choice, as average programs cost about $33,000 compared to $102,000 for bachelor's degrees, and the availability of scholarships, grants and payment plans attracts budget-conscious students seeking to avoid debt.
- Qualified faculty and program reputation carry weight, as customers value expert instructors with real-world experience and positive reviews, while high completion rates and alumni success stories reinforce a school's reliability.

Category Trust+Credibility

> *30.9% of U.S. Adults believe the marketing practices of colleges/universities (including trade schools) are credible*

	Audience	All Respondents	Difference
65+	**24.1%**	21.6%	**+12%**
35-44	19.3%	18.2%	+6%
18-24	9.3%	9.6%	-3%
55-64	17.5%	18.5%	-5%
45-54	14.8%	15.8%	-6%
25-34	15.1%	16.6%	-9%

"More likely" or "less likely" than the average U.S. adult 18+.

Credibility - and whether a person has it or not - determines who you trust for guidance and information you use to make decisions in your everyday life. The four components of credibility for any human being are (1) being known, (2) being likable, (3) being helpful, and (4) being trustworthy. Credibility is gained (or lost) by what one says, how they say it, what they do and, finally, what others say about them. Having credibility also requires having others' best interests at heart.

SOURCE: 2026 State of Credibility 2026 Methodology

Trust Drivers

69.1% of U.S. adults **do not indicate a belief that the marketing** of colleges/universities (including trade schools) is credible. The following responses are from this audience of consumers.

> *What are the best ways for a company to demonstrate their credibility, trustworthiness and value through their marketing practices?*

Marketing Practice	Audience
Being transparent about what their product or service can and cannot do	65.1%
Showing real customers and authentic experiences rather than overly polished or staged advertising	62.9%
Making pricing, fees and terms easy to find without having to dig for them	53.5%
Clearly disclosing when their content is sponsored, paid or AI-generated	46.9%
Responding publicly and personally to negative reviews rather than ignoring them	44.8%
Providing and standing behind a clear, easy-to-use refund or satisfaction guarantee	44.4%
Taking a clear, consistent and authentic stand on values without changing them based on trends	38.7%
Showing the real people behind the business rather than hiding behind a brand	37.1%
Being visibly involved in and giving back to their community	35.3%
Being findable and well-represented across Google, AI search and review platforms	23.8%
Displaying third-party recognition such as industry awards, certifications, accreditations, or media coverage	19.4%
Emailing, calling and/or texting me less often	17.3%

How do you tell if a company you've never heard of before is legitimate?

Vetting Method	Audience
I search for them on Google or another search engine.	55.6%
I look for reviews on sites like Yelp, Trustpilot or Google Reviews.	47.6%
I ask friends, family or colleagues if they've heard of them.	44.6%
I ask myself if the offer seems too good to be true.	39.8%
I check their Better Business Bureau rating or complaints.	38.6%
I check for their professional-looking website with a physical address and phone number.	37.6%
I look for industry certifications, association memberships or if they're licensed in my state.	34.5%
If I have any doubts, I simply move on and look for someone else.	32.5%
I check their social media presence to see how active, responsive and authentic they are.	27%
I search for them on an AI assistant like ChatGPT.	16.1%
