Case Study

Ecommerce

A beverage retailer came to Adtaxi to cut through the clutter and increase their number of online checkout conversions.

adtaxi

The Challenge

To expand the client's digital presence and stand out among a huge product selection and diverse inventory.

Solution

Dynamic Retargeting

Re-engage and convert previous site visitors through custom ads and advanced bidding strategies.

Strategy

- Add dynamic retargeting to the e-commerce campaign, utilizing product specific creatives.
- Target visitors who browsed and researched products for unique beverages but did not convert previously.

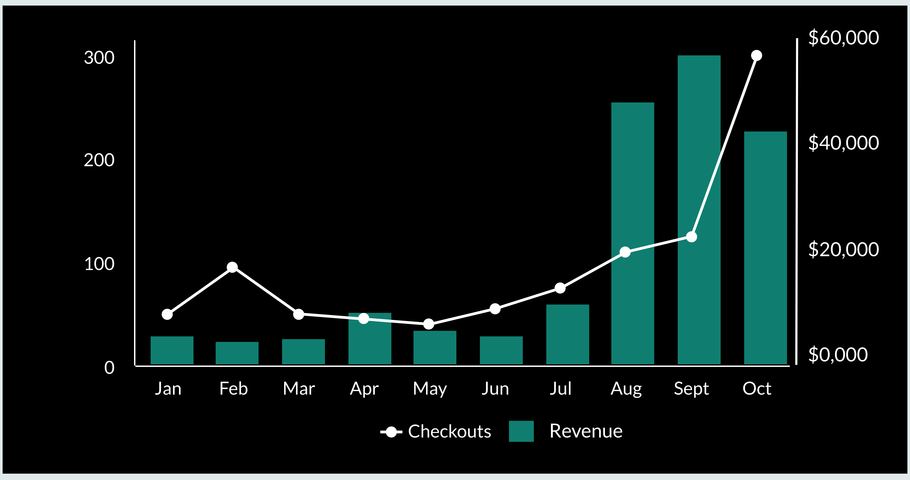

Results

1100%

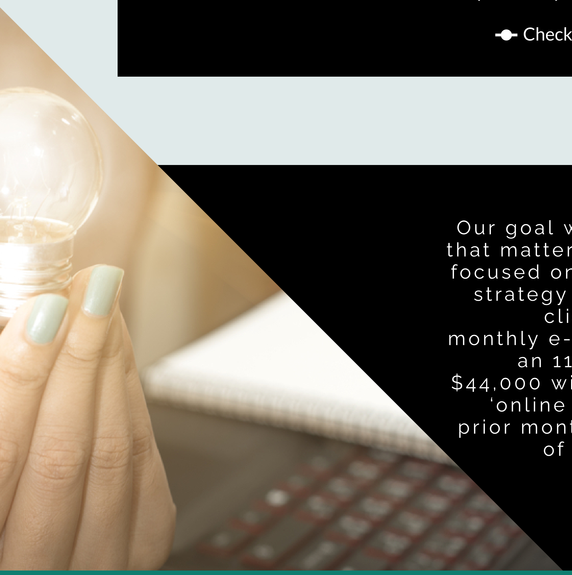

Increase in Return on Advertising Spend (ROAS)

482%

Increase in checkouts over the course of the campaign

Key Insights

Our goal with any campaign is to deliver the metrics that matter most to the client: in this case, they were focused on driving revenue and improving ROAS. Our strategy resulted in the highest online revenue the client has ever seen. On average, the client's monthly e-commerce was generating $5,500. We saw an 1100% Return On Ad Spend increase totaling $44,000 with the ad spend being $4,000. We saw the 'online shopping sign ups' more than double from prior months adding 108 total sign ups. The addition of Adacado dynamic retargeting significantly boosted both checkouts and revenue.
