CBD Success Story:

Finding success in display ad marketing for advertising constrained CBD category.

adtaxi

Campaign Goal & Challenges

This CBD client was leveraging a mix of outside vendors and in-house campaigns for marketing. Like many, they wanted to test how Adtaxi would compare to their current efforts. But, it wasn't a simple, "beat the competition" challenge; they set a high bar that came in phases.

Phase 1: Prove growth in **net new** customers with an extremely short attribution window.

Phase 2: After discovering the buying cycle proved longer for consumers to become educated and move to purchase, the attribution window was expanded but was still short compared to typical e-commerce sites. In addition, this change came with the expectation of a sizable **6-figure revenue** goal or a **2.3 ROAS**.

Campaign strategies :

1. Leverage DSP relationship

Adtaxi has a deep understanding of working within the confines of CBD marketing and has fostered a strong working relationship with our DSP partner that allows us to scale a client's marketing. We've pre-vetted inventory supply sources and developed an allow-list of sites/apps/programs that accelerate the speed to market and size of the market available.

2. Discovering and influencing new audiences:

We were able to discover new sectors of growth within certain sports enthusiasts, pet lovers and seniors. We utilized various sources of research insights and leveraged compelling imagery that appealed to the behavioral aspects of these audience segments that conveyed more than words...which are often restricted.

3. Move to budget based buying, not CPM based

At Adtaxi, we focus on conversions and take a data-driven approach to strategically bid on consumers with a higher propensity to purchase. We bid on these buyers more aggressively in order to increase conversions and drive a higher ROAS rather than being confined to stringent CPM metrics, which the client originally weighed heavily as a key metric.

4. Refined campaigns for a full-funnel approach

Over time, we refined the prospecting and retargeting efforts as we continued to gather key learnings. In the early stages, we allocated the budget across the funnel with 55% going to the top and middle and 45% to the bottom. As we gleaned insights that the buying cycle was typically longer as visitors learned more about the company and their products, we shifted to 75% top and middle and 25% bottom. Our retargeting efforts at the middle of the funnel (engaging people that viewed products, but didn't convert) was a key component to this. Overall, this provided more focus on exposing a great number of people to the brand and more importantly, nurturing them through the entire buying process.

Results:

Based on the strong performance of our campaign, the client went from a $4,000 test to just under 6-figures per month in ad spend in under a year.

Effectively shattered their ROAS goal of 2.3 by over 3x on average over the past 6 months and over 4x in the last month.

Performance highlights:

40M	$.6M+	7.4x	10.5x
Average monthly impressions	Average monthly revenue	6-month average ROAS	ROAS in the last month

"The most intelligent conversation we've had so far. You are making the most strategic decisions with our budget and campaign." CMO

Key Insights

Nurturing new clients through the entire buying journey was critical, especially with learning that their consumers have a longer buying cycle.

We proved through performance that Adtaxi's budget based buying approach focusing on conversions was strategically stronger than managing to a low CPM.

Gaining alignment on how Adtaxi accounts for attribution - especially as it relates to view-through conversions - was a key to the success of this initiative with the client.
