Auto Dealerships (All Makes)

Includes category intelligence for dealerships of all makes of new and used automobiles, light trucks, sport utility vehicles, and passenger/cargo vans.

Industry Background

Boston (Manchester) TV market includes all or portions of these counties: Barnstable, Belknap, Carroll, Cheshire, Dukes, Essex, Essex, MA, Hillsborough, Merrimack, Merrimack, NH, Middlesex, Middlesex, MA, Nantucket, Norfolk, Plymouth, Plymouth, MA, Rockingham, Strafford, Suffolk, Suffolk, MA, Windham, Worcester

Primary NAICS Code: *441110*
New Car Dealers

Primary SIC Code: *5511*
Motor Vehicle Dealers (New and Used)

Industry Intel

New-car dealerships report revenues from sales of new and used cars as well as from vehicle maintenance and repair. Financing the lease or purchase of autos is another revenue source for dealerships.

Dealerships must compete with businesses that sell competing brands as well as businesses that sell the same brands at lower prices. New car purchasing and leasing are closely linked to the economic health of the United States, and consumer preferences for vehicle features shift as gas prices rise and fall.

New light-vehicle sales totaled 16.2 million units in 2025, an increase of 2.4% compared to 2024. The average transaction price for a new light vehicle in December 2025 was approximately $47,104, up 1.5% compared to December 2024. Industry professionals are forecasting sales of 16.0 million units in 2026. Total franchised light-vehicle dealership sales were $1.3 trillion. Dealerships wrote more than 276 million repair orders, with service and parts sales exceeding $164 billion.

There are approximately 16,990 new-car dealerships across the United States. About 8,000 dealership companies own an estimated 18,000 franchised stores, and the top 150 groups control 26.6% of franchised dealerships. About 91% of owners operate one to five stores.

New car dealerships affiliated with specific manufacturers represent the traditional franchise model and drive a significant share of industry revenue through new vehicle sales, trade-ins and manufacturer-backed financing programs. These dealerships must meet brand standards for facility appearance, technology infrastructure and staff expertise.

Independent used car dealerships range from small owner-operated lots to large regional chains like CarMax and operate without direct manufacturer affiliation. This segment focuses heavily on sourcing quality used inventory, often acquiring vehicles through auctions and trade-ins from other dealerships.

Luxury brand dealerships operate under distinct business models emphasizing premium customer service, high-touch consultation and exclusive brand experiences. Some manufacturers like Mercedes-Benz have experimented with city-center brand stores separate from traditional dealership formats.

Multi-brand dealership groups represent a growing trend in which corporate-owned chains operate numerous locations selling vehicles from multiple manufacturers. These operations benefit from economies of scale in marketing, operations and technology investment.

BUILT-TO-ORDER

Purchasing built-to-order vehicles allows for selecting vehicle options and for customers to negotiate the total price, just like any other car purchase. By ordering a custom-built car, buyers have the flexibility to select the exact colors, packages and features. Wait times for these vehicles can vary, and orders are typically made via dealerships, which act as intermediaries. Wait times tend to be at least two to four months.

Analysts believe consumers are willing to wait a few weeks to get what they want. That aspect of the market has already been shown to work as consumers purchase other goods online and sometimes wait a few days for delivery. In addition, competitors like Tesla and other electric vehicle makers have already trained consumers to wait for the vehicle they ordered with the exact options they wanted.

However, the incentive-based system may be greatly reduced as dealers move to an order-based system. Dealers will have lower costs because they won't have to transport vehicles from a nearby dealership.

Industry professionals report that interest in this type of purchase largely stemmed from the global microchip shortage. Dealerships faced shortages of popular car models, leading more buyers to order directly from the manufacturer to get the car they wanted.

Note that ultra-luxury automakers have found a niche in customizing vehicles for affluent buyers. Many offer an in-person upscale experience and boast wait lists for buyers seeking this option.

To stem any cuts in ad spending, media sales reps can remind dealers to promote their parts and service department. In addition, they can advertise financing deals. And it's always appropriate to try to lure buyers who are loyal to another brand by allowing them to build their car they really want instead of settling for less.

AUTOMOTIVE FLEET SALES

The primary customers for this segment are rental car agencies, government agencies, utilities, and police departments.

Buyers need as few as three vehicles or up to 15 vehicles in operation to qualify as a fleet. As a fleet buyer, they qualify for benefits like price discounts and repair programs. But to obtain big discounts, fleet operators must commit to a manufacturer's terms.

When new models are introduced, especially if there will be a limited quantity, fleet buyers may register interest by filling out a form at the manufacturer site. They will then be notified to contact local dealers to place an order. For some orders and models, pricing is negotiated between the dealer and the customer.

However, there are much larger arrangements between automakers and fleet buyers. For example, when state agencies purchase fleet vehicles, they may put their contract out to bid to secure the best deal. Historically, fleet transactions to rental car companies are often large and generally less profitable than traditional retail sales.

Fleet managers consider how long to keep existing vehicles, the length of lead times for ordering new models, fuel economy, safety equipment, and incentives and pricing.

The industry has experienced a notable rise in fleet sales, which outperformed retail new-vehicle sales in 2023, ending the year with 2.7 million units sold. This growth encompasses sales across rental, commercial, and government fleets, indicating a broad-based recovery and expansion within the sector.

For the calendar year-to-date, commercial car sales were up 13.5% year-over-year, with truck and SUV sales to rental fleets increasing by 109.9%. Government fleets also saw significant increases in car sales (119.2%) and truck and SUV sales (39.4%). This suggests varying degrees of demand across different fleet segments, with rental fleets showing particularly strong growth.

The success of the new-vehicle market in 2023 has been attributed mainly to the return of fleet sales, driven by pent-up rental and commercial demand. This shift comes after a period where manufacturers prioritized dealership availability over fleet sales due to production constraints.

The industry is expected to return to a state of "normalcy," with slow growth anticipated across new, used, and wholesale auto markets. New-vehicle inventory is expected to reach pre-pandemic norms, leading to downward pressure on transaction prices and a more favorable environment for consumers.

The fleet sector is also expected to see an increase in electric vehicle (EV) adoption, with more models, incentives, and sales efforts anticipated. This aligns with broader industry trends toward electrification and sustainability.

As electrification of vehicles continues, automakers are building in programs and subscription services to help fleet managers and local dealers optimize vehicle maintenance. This arrangement may boost revenue and profitability for the local dealers.

Executive Summary

24.3% of US adults said "New car/truck" when asked "When it comes to transportation, I intend to purchase these items in the next 12 months..." That's **1,362,523 adults** in the Boston (Manchester) TV market.

There are 21 active Media Sales Opportunities for Jeep Dealers,MINI Dealers,Chrysler Dealers,Subaru Dealers,Mitsubishi Dealers,Infiniti Dealers,BMW Dealers,Kia Dealers,Toyota Dealers,Porsche Dealers,Ford Dealers,Nissan Dealers,Ram Dealers,Lincoln CPO Dealers,Volvo Dealers,Ford Dealers,Lexus Dealers,Kia Dealers,Hyundai Dealers,Fiat Dealers and Jeep Dealers

Top sales months for Auto Dealerships (All Makes) are: August, March, April.

The Annual Advertising/Marketing Budget is approximately **0.96%** of retail sales - for all dealerships, on average. Co-op advertising, when automakers finance part of dealer advertising, is significant for dealers, with some reporting that it accounts for about 95% of their ad spending. Additionally, dealers, on average, spend over $160,000 on search engine marketing and social media advertising.
AUTOMOTIVE VERTICALS AND ADVERTISING
Tier 1 – Automotive Manufacturers (OEMs): These are the large brands like Ford, Toyota and GM. They run national campaigns to build brand awareness, shape their image, and promote new models, using TV, print and digital media with substantial budgets. A significant amount of national TV ad spending by these companies goes to sports programming, such as the NFL and March Madness

to reach the live viewing audiences. However, they also fund co-op ad programs for local spending.
Tier 2 – Regional Dealer Associations: These are groups of dealerships working together to market within a specific region. These campaigns focus on promotions and incentives, connecting the national brand to buyers through targeted messaging that may emphasize unique geographic or demographic elements of the region.
Tier 3 – Individual Dealerships: These include both new and used car dealers marketing directly to their local community. Efforts are hyper-local, using social media, local ads, events, and promotions to drive foot traffic and sales to specific locations. Messaging is typically focused on inventory, pricing and financing options. Co-op advertising funds can account for well over half of the local ad spending that is done by dealerships.
This amounts to an estimated ad budget of **$294,504** per location for average size new car dealers in the Boston (Manchester) TV market. To be average in this market, new car dealers need to spend **$11,382** per employee on advertising every year. In the Boston (Manchester) TV market there is an estimated **$320,420,400** in ad revenue.

There are multiple co-op advertising plans available: Alfa Romeo, Audi of America, BMW Automobiles, Cadillac, Clore Automotive, Ford, General Motors, GM Parts, Hyundai Motor America, Hyundai Motors - Genesis, See full report for more!

Local media spending for Automotive: Tier 3 - New Car Dealers in Boston (Manchester) breaks down like this:

- Digital/Online 64.7%,
- TV/Radio/OOH 27.2%,
- Print 8.2%

Know the Customers

Target Customers

New and used vehicle shoppers are patrons of auto dealerships.

- Adults aged 25 to 54 with mid-to-high income levels represent the primary target market for auto dealerships, accounting for the largest share of new vehicle purchases. This demographic possesses strong financial capacity for vehicle acquisition, representing the core purchasing power across dealership operations. Within this segment, professionals and families with stable employment dominate buying patterns.
- Families with children represent another important customer segment, seeking larger vehicles with advanced safety features, ample cargo space and entertainment options for comfortable family transportation. This segment demonstrates higher purchase frequency as children age and family needs evolve.
- Outdoor enthusiasts and lifestyle-driven consumers seeking specialized vehicles including SUVs, pickup trucks and off-road capable models represent another segment.

[Sources: "Grade Your Target Audience: 10 Consumer Metrics Car Dealerships Need To Analyze." edificeautomarketing.com, 2025. Web. 5 May 2026; "Dealership Marketing: Audience Segmentation Guide." porchgroupmedia.com, 2025. Web. 5 May 2026.]

High-income households now account for a growing share of U.S. new car sales. Those earning more than $150,000 annually represent 43% of purchases, up from 30% in 2019, while households earning less than $75,000 account for 26% of sales, down from 37%.
[Source: "New cars kept selling in 2025, just not to everyday buyers." thehill.com, 6 Jan. 2026. Web. 6 May 2026.]

Target Customers by Mile Radius

Most customers are drawn from a 469 mile radius.

Consumers are willing to drive, on average, about eight hours from home to buy a new car, which translates to an average distance of 469 mile. However, the ability to purchase vehicles online with convenient delivery means some consumers will personally travel as far but make purchases that are not local to them.
[Source: “Survey: Americans Will Drive 469 Miles to Score Deal on New Car.” Kelley Blue Book. Kbb.com, 24 Jun. 2022. Web. Mar. 2024.]

Top Factors People Consider When Choosing This Type Of Account

- Dealership reputation and customer reviews rank as the top selection criterion, with nearly 59% of car buyers identifying reputation as the most important factor when choosing an auto dealer.
- Inventory quality and condition are also critical, as customers seek dealerships that maintain high standards for vehicle selection and reconditioning.
- Online presence and digital transparency are important, with 71% of buyers researching prices, 68% browsing inventory and 64% comparing models online before visiting dealerships. Third-party websites (78%) and dealer pages (53%) also guide the buying journey.
- Expertise and transparency from sales staff are essential, as customers expect dealerships to demonstrate deep knowledge about vehicles, maintenance costs, features and trade-in values. Honest pricing practices, willingness to share condition reports and access to industry valuation tools signal trustworthiness.

[Source: "Follow These Best Practices in Your Automobile Dealership." jmagroup.com, 2025. Web. 5 May 2026.]

Price is the top consideration for American car buyers, cited by 68% of respondents. Other key factors include vehicle performance (60%), safety (56%), fuel efficiency (55%), maintenance costs (51%), and vehicle size (50%). Additional considerations include engine type (47%) and design or appearance (42%), while advanced technology features (30%) and environmental impact (21%) are less influential, indicating these remain more niche priorities.
