Doctors, Chiropractors

Includes category intelligence for chiropractors and chiropractic clinics.

Industry Background

Primary NAICS Code: *621310*
Offices of Chiropractors

Primary SIC Code: *8041*
Offices and Clinics of Chiropractors

Industry Intel

Chiropractors treat patients suffering from back pain or injury, as well as offer nutritional counseling and recommend exercise therapy. These professionals usually study at dedicated schools and learn the theories and methods of spine manipulation. Doctors of chiropractic (DCs) undergo at least four years of professional study and training at chiropractic colleges accredited by the Council on Chiropractic Education (CCE). Not all states require chiropractors to have both an undergraduate degree and a chiropractor's degree to practice.

Patients may visit chiropractors for a limited set of treatments. Other patients maintain a long-term relationship with their chiropractors. While many consumers pay out of pocket for these services, some insurance coverage is available.

Chiropractor services are considered an alternative to the more mainstream treatments available through medication and surgery. These professionals also counsel clients on the importance of a healthy lifestyle, especially diet and exercise.

Chiropractors may be sole practitioners, or they may operate as part of a medical services group. These practices are split into categories like, single-location companies, multi-location companies, associates, and franchises. Small companies compete by servicing a local community or integrating into a larger holistic health practice. An industry survey found that 49% of chiropractors are solo practitioners; 36% work in multi-doctor offices, and 12% in multidisciplinary or integrated health facilities.

There are approximately 66,000 chiropractic establishments in the U.S. reporting a revenue of approximately $24 billion.

Limited-Time Opportunities+Shareables

Chiropractors Can Drive Business by Educating 64% Who May Not Be Familiar with Services

Chiropractic care is about more than just back pain; it can be preventative, too. According to AudienceSCAN research, 14.4% of U.S. adults suffer from chronic pain. Media reps can encourage chiropractors to use targeted advertising to educate consumers about their role in improving mobility and overall wellness, helping attract a broader range of patients.

Doctors, Chiropractors Can Reconnect With Patients Before Year-End

According to AudienceSCAN research, 5.7% of U.S. adults are chiropractic patients. As the year draws to a close, some patients may have unused healthcare account funds available for eligible services. Chiropractors can use timely advertising to reconnect with former and existing patients, encouraging them to schedule year-end checkups or other needed care while taking advantage of available benefits. AudienceSCAN data also shows that 20.2% of patients called or visited the advertiser after viewing an ad.

HEALTHCARE MARKETING

Healthcare practices are entering 2026 with rising marketing budgets, expanding digital strategies and increased adoption of artificial intelligence tools. 62% of practices expect their marketing budgets to increase in 2026, while another 29% expect budgets to remain stable.

Investment is increasingly shifting toward digital-first channels:

- 58% plan to increase influencer marketing spending.
- 50% plan to increase email marketing spending.
- 48% plan to increase paid social advertising.
- 48% plan to increase video marketing.

Practices are also experimenting with new communication formats to engage patients more directly:

- 33% plan to test SMS/text marketing for the first time in 2026.
- 32% plan to test email marketing for the first time.
- 31% plan to test organic social media initiatives for the first time.

Despite growing digital adoption, traditional advertising remains highly valued. Practices ranked their 2026 budget priorities as follows:

1. Traditional marketing (TV, radio, print, billboards)
2. Paid/organic social media
3. Video/content marketing
4. Pay-per-click advertising

Artificial intelligence is rapidly moving beyond content generation and becoming integrated into both marketing operations and patient intake workflows. Survey results show widespread adoption of AI-powered tools:

- 67% of practices use AI for personalizing campaigns or improving customer experiences.
- 59% use AI for attribution or ROI measurement.
- 54% use AI for automating customer communication such as chatbots, emails, and SMS.
- 53% use AI for lead scoring or qualification.

Only 31% of practices cited HIPAA compliance as a major challenge related to AI usage, reflecting growing confidence in tools that provide PHI redaction, encrypted storage, role-based access, and stricter data controls.

As marketing investments generate more patient inquiries, many healthcare practices are struggling to keep pace operationally. 63% of organizations identified lead follow-up and conversion as their primary bottleneck entering 2026.

Most practices still rely heavily on manual intake processes:

- 58% rely on front-desk staff to handle intake directly.
- 49% route web form submissions to general email inboxes.
- 45% use centralized phone systems with call routing.

Despite increased marketing investment, many healthcare organizations still lack confidence in attribution and campaign measurement. Only 51% of practices reported being “extremely confident” that they understand which channels generate their best patients.

Operational maturity appears closely tied to attribution confidence:

- 84% of highly confident practices report efficient approval processes.
- 72% of practices overall report similar operational efficiency.

Note also that patients now initiate contact across multiple communication channels:

- 58% first contact practices by phone.
- 48% use email.
- 47% submit web forms.
- 45% use chatbot or live chat systems.

Know the Customers

Target Customers

According to the latest government data, adults seeking relief from low back pain, neck pain, and other musculoskeletal issues are the core target market for Doctors, Chiropractors, as 11.0% of U.S. adults used chiropractic care in 2022 and 85.7% of those did so primarily for pain management.

Chiropractors most commonly treat the following:

- Neurological problems such as headaches
- Joint problems including osteoarthritis, extremity subluxations, sprains, and intervertebral disc syndrome
- Muscular problems such as strained or weak muscles and myofasciitis

[Source: NBCE.org, n.d. Web. 30 Jun. 2026.]

Women are also a target market, considering chiropractors may assist by being able to:

- Provide relief from menopause/PMS symptoms
- Prompt better birthing positions for the expectant mother
- Reduce the presence of osteoporosis symptoms

Baby boomers are predicted to be a future lucrative market, as this large group is aging and may need these services.
[Sources: chiroeco.com, n.d. Web. 30 Jun. 2026; "Chiropractic: In Depth." nccih.nih.gov, 2024. Web. 29 Jun. 2026.]

Target Customers by Mile Radius

Most customers are drawn from a 3 mile radius.

Note that while 3 miles is ideal for suburban medical practices, a rural office can serve up to 25 miles and an urban office can serve a market area as narrow as 1.5 miles.
[Source: The Joint.com.]

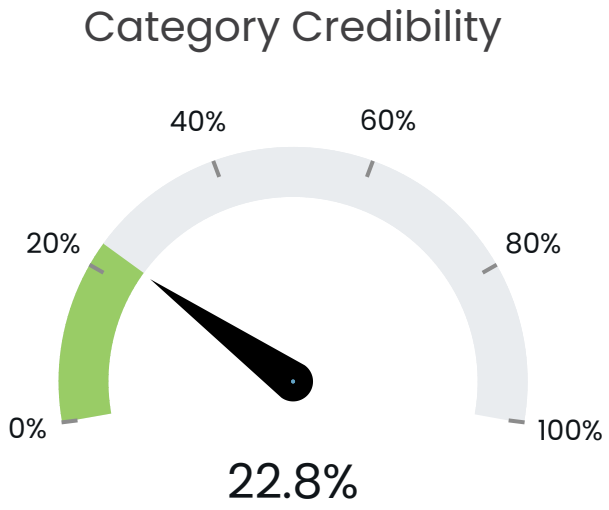

Top Factors People Consider When Choosing This Type Of Account

- Effectiveness for pain relief: Top driver of chiropractor choice; 85.7% of users seek care for pain management, with marketing focused on outcomes like back, neck, and headache relief.
- Trust, credentials, and safety: Second key factor; patients prioritize licensure, training, and safety perceptions, so marketing emphasizes qualifications and evidence-based care.
- Accessibility and convenience: Location, hours, and appointment availability strongly influence choice; marketing highlights proximity, maps, and flexible scheduling.
- Cost, insurance, and value: Patients compare out-of-pocket costs and coverage across providers; marketing stresses insurance acceptance, pricing clarity, and value vs. alternatives.
- Lifestyle and philosophy alignment: Wellness-oriented patients prefer non-drug, holistic care; marketing focuses on prevention, integrative health, and lifestyle-based messaging.

Category Trust+Credibility

> *22.8% of U.S. Adults believe the marketing practices of chiropractic doctors are credible*

	Audience	All Respondents	Difference
65+	**28.2%**	21.6%	**+31%**
55-64	18.8%	18.5%	+2%
45-54	15.9%	15.8%	+1%
35-44	16.7%	18.2%	-8%
25-34	13.1%	16.6%	-21%
18-24	7.3%	9.6%	-24%

"More likely" or "less likely" than the average U.S. adult 18+.

Credibility - and whether a person has it or not - determines who you trust for guidance and information you use to make decisions in your everyday life. The four components of credibility for any human being are (1) being known, (2) being likable, (3) being helpful, and (4) being trustworthy. Credibility is gained (or lost) by what one says, how they say it, what they do and, finally, what others say about them. Having credibility also requires having others' best interests at heart.

SOURCE: 2026 State of Credibility 2026 Methodology

Trust Drivers

77.2% of U.S. adults **do not indicate a belief that the marketing** of chiropractic doctors is credible. The following responses are from this audience of consumers.

> *What are the best ways for a company to demonstrate their credibility, trustworthiness and value through their marketing practices?*

Marketing Practice	Audience
Being transparent about what their product or service can and cannot do	65.8%
Showing real customers and authentic experiences rather than overly polished or staged advertising	63.1%
Making pricing, fees and terms easy to find without having to dig for them	55.5%
Clearly disclosing when their content is sponsored, paid or AI-generated	46%
Responding publicly and personally to negative reviews rather than ignoring them	45.4%
Providing and standing behind a clear, easy-to-use refund or satisfaction guarantee	44.4%
Taking a clear, consistent and authentic stand on values without changing them based on trends	38.4%
Being visibly involved in and giving back to their community	37.9%
Showing the real people behind the business rather than hiding behind a brand	36.9%
Being findable and well-represented across Google, AI search and review platforms	25.8%
Displaying third-party recognition such as industry awards, certifications, accreditations, or media coverage	19.5%
Emailing, calling and/or texting me less often	18.4%

How do you tell if a company you've never heard of before is legitimate?

Vetting Method	Audience
I search for them on Google or another search engine.	57.2%
I look for reviews on sites like Yelp, Trustpilot or Google Reviews.	50.7%
I ask friends, family or colleagues if they've heard of them.	44.9%
I check their Better Business Bureau rating or complaints.	40%
I ask myself if the offer seems too good to be true.	40%
I check for their professional-looking website with a physical address and phone number.	39%
I look for industry certifications, association memberships or if they're licensed in my state.	33.8%
If I have any doubts, I simply move on and look for someone else.	32.4%
I check their social media presence to see how active, responsive and authentic they are.	27.1%
I search for them on an AI assistant like ChatGPT.	16.5%

- Complementary and Alternative Medicine Facilities/CBD Stores

Indicates the information displayed has been produced by generative AI. This content differs from the rest of the data in AdMall, as it is produced in real-time and not human-verified. While it has been trained with every article from SalesFuel Today and Media Sales Today in the past six years, along with the works of C. Lee Smith, it can also draw information from public sources that may be unreliable. You should discuss any suggested course of action with your manager before proceeding. AdMall Sales Coach should not be used as substitute for legal advice, mental health therapy, HR guidance nor financial advice.
