Primary NAICS Code: *522130*
Credit Unions

Primary SIC Code: *6061*
Credit Unions, Federally Chartered

Industry Intel

Credit unions are member-owned, not-for-profit financial cooperatives that provide many of the same products as banks but return earnings to members through better rates, lower fees and community programs. They serve both consumers and businesses, with a historic focus on local communities, specific employee groups and affinity segments.

In the U.S., the federal credit union system is large and mature, with steady asset and loan growth, high net worth ratios and strong loan performance compared with many other lenders.Membership continues to rise, although growth has slowed in the last two years as competition from banks and fintechs intensifies and demographics shift.

Federally insured credit unions (the vast majority of the market) are regulated and backed by the National Credit Union Administration (NCUA), similar to FDIC insurance for banks. This makes them a mainstream, highly trusted option for everyday banking, borrowing and small business finance.

Members often use credit unions as providers of credit cards, auto loans and home loans. Most credit unions are federally insured while a few hundred operate as state-chartered credit unions.

Traditionally, credit unions have been restricted to a specific membership because of their initial charter. Some credit unions have revised their charters and seek to operate throughout a region and therefore can advertise to a wider audience.

The total number of federally insured credit unions declined to 4,331 from 4,499 in Q3 2024, reflecting continued consolidation, while overall financial performance strengthened. Total assets rose to $2.40 trillion, up $86 billion (3.7%) year over year, and total loans outstanding increased to $1.70 trillion, up $72.3 billion (4.4%). Industry revenue for U.S. credit unions is approximately $147.4 billion.

Membership expanded to 145.0 million, adding 3.1 million members over the year, underscoring a sector marked by moderate growth, rising profitability, strong capitalization, and continued, though slower, member expansion.

By charter/membership:

- Federal credit unions: 2,715 institutions in Q3 2025, chartered and supervised by NCUA.
- Federally insured, state-chartered credit unions: 1,616 institutions in Q3 2025, chartered by states but insured and overseen for safety and soundness by NCUA.
- Low income designated credit unions: 2,392 institutions, representing 55% of all federally insured credit unions in Q3 2025, serving a high proportion of low income members and often qualifying for special programs and grants.

By asset size:

- Very large credit unions (over $10B in assets): 57 institutions holding 25% of system assets, with 5.8% loan growth, 4.1% membership growth, and 5.7% net worth growth; typically operate multi-channel marketing across national or multi-state footprints.
- Large credit unions ($1B to under $10B): 438 institutions holding 53% of system assets, reporting 6.3% loan growth, 4.5% membership growth, and strong net worth expansion; highly active in paid media, sponsorships, and digital engagement.
- Mid-sized credit unions ($100M to under $1B): Over 1,000 institutions with localized footprints, showing slower growth and more variability, with some modest declines in loans or membership due to rising competition.
- Small credit unions (under $100M): Numerous but shrinking in count, with slower growth and higher consolidation; typically rely on word of mouth, community presence, and limited advertising budgets.

opportunity is in deposits and loans?

- How do marketing, lending and branch teams currently share data about campaign results, and where do you see the biggest gaps between marketing leads generated and funded accounts or loans?

Target Customers

Typically, to become a credit union member, a consumer must be a member of a particular community, such as a church, region or business.

Top markets include:

- Middle-aged mass market consumers (45–64): The core credit union base, highly loyal, holding multiple products, and generating a large portion of deposits and loans; key for near-term revenue and cross-sell strategies.
- Older members approaching or in retirement: High-value segment, especially baby boomers, controlling a disproportionate share of deposits and investments and central to retention and wealth-related planning.
- Millennial and Gen Z consumers: Underrepresented but strategically critical for growth, responsive to personalized, digital-first engagement, and key as wealth shifts toward younger generations.
- Professionals, salaried employees, and self-employed individuals: Likely to be members, bringing stable income, multi-product potential, and opportunities for both personal and small business banking.
- Small business owners and local entrepreneurs: Emerging high-value segment, supporting commercial lending growth and providing both deposit and lending opportunities, influencing broader household banking relationships.

Target Customers by Mile Radius

Most customers are drawn from a 5 mile radius.

Credit unions serve a multitude of niche groups based on reasons for membership. The distance may vary per credit union.
[Source: “Reasonable Proximity Analysis.” National Credit Union Administration. Ncua.gov]

Top Factors People Consider When Choosing This Type Of Account

Gen Z consumers are seeking credit unions that offer credit card apps (21%) and biometric codes (17%). Around 29% of Gen Zers used a credit union to finance their car loans.

Economics incentives, such as loyalty programs, are important by generation as follows:

- Gen X 50%
- Millennial 40%
- Gen Z 30%

[Sources: Rewards Move Credit Unions Top of Mind. pymnts.com. 10 Feb. 2025. Web. Mar. 2025; Coleman, Ryan. Consumer Trends Open Doors. 28 Feb. 2025. Web. Mar. 2025]

Consumers who are over age 50 make good targets for credit unions because they are seeking:

- Financing for a second home
- Savings programs to fund vacations
- Financing to start a business
- Refinancing of existing properties
