Dentists and Orthodontists

Includes category intelligence for providers of dental care, cleaning, tooth whitening, implants, bridges, cosmetic correction, orthodontics, and teeth alignment

Industry Background

Primary NAICS Code: *621210*
Offices of Dentists

Primary SIC Code: *8021*
Offices and Clinics of Dentists

Industry Intel

Dentists are highly trained professionals who complete up to eight years of college and then obtain licenses to treat dental problems. Some dentists practice in a group setting while others are solo practitioners with a staff that includes hygienists and administrative staff. Approximately 35% of dentists work in a single-location, solo-dentist practice. 40% work in a single location with two or more dentists. Independent dentists often establish themselves in a community and take several years to develop a client base.

Approximately 14% of U.S. dental practices are affiliated with a dental service organization/dental support organization (DSO). These organizations offer support in areas like administration, marketing and nonclinical tasks, allowing dental practice owners to focus on patient care. They come in various sizes and structures, with some locally or nationally branded. DSOs may be privately held or partner with private equity firms though dentists typically own and operate their individual practices. Note that approximately 21% of orthodontists work with a DSO.

Dentists may also specialize in offering cosmetic or orthodontic procedures, as well as implants. Dentists work closely with labs that manufacture custom dentures, crowns and bridges. As new procedures develop, the dental profession continues to expand from cleaning teeth and filling cavities to offering adult orthodontics and other cosmetic work. Approximately 52% of general dentists provide orthodontic treatment. Of those, 45% provide clear aligners, and 19% use traditional wire and bracket treatment.

Dentists also rely on insurance companies for reimbursement of costs related to routine procedures. However, cosmetic procedures are often more lucrative and not reimbursable by insurance.

The entire dental industry reports revenue of $190.4 billion and includes approximately 181,000 businesses. U.S. orthodontists total about 2,700 businesses that report revenue of $4.1 billion.

Items commonly offered by Dentists and Orthodontists

- Accepts insurance
- Cosmetic options
- Teeth whitening
- Sleep apnea treatment
- Dental lab on premises
- Financing available
- Membership club
- Free consultation
- Participating in group plans
- Conscious sedation
- Teledentistry

Related Industries

COSMETIC DENTISTRY

There are an estimated 6,200 cosmetic dentistry businesses in the United States, reporting revenue of $5.6 billion. Typical services often include:

- Crown and bridge procedures
- Direct bonding
- Veneers
- Inlays
- Implants
- Bleaching/Whitening

ORTHODONTICS

Orthodontists are specially trained to straighten misaligned teeth with braces, retainers and other methods. Note that new competition is emerging from online companies offering custom 3D-printed invisible aligners. Additionally, more general dentists are offering alignment services.

The following is a snapshot of common orthodontic treatment costs:

Ceramic braces	$5,834
Clear aligners	$5,108
Dental braces (metal)	$6,343
Lingual braces	$9,221
Retainers (bonded)	$344
Retainers (clear plastic)	$181
Retainers (molded acrylic)	$302

Note that traditional wire braces continue to be more widely used than aligners. The average starts for wire and bracket treatment totals 204 per practice annually. Aligner treatment averages 80 starts.
[Sources: Orthodonticproductsonline.com, 5 Apr. 2024. Web. 4 Apr. 2025; Portalatin, Ariana. "Average cost of orthodontic treatments in 2024." Beckersdental.com, 25 Sep. 2024. Web. 3 Apr. 2025.]

ORAL SURGEONS

Oral surgeons are generally dentists who have additional education and certification. Between 7,000 and 9,000 oral surgeons operate in the U.S. The North American oral surgery market is valued at around $1.85B. Many oral surgeons operate in private practices and rely on referrals from dentists.

The most popular procedures include:

- Dental implants
- Full-arch restorations
- Third molar extractions
- Corrective jaw surgery

Around 77% of oral surgery leads come from a referral, while 28% arrive because of practice marketing. However, 64% of referral leads convert, while only 27% of marketing leads do. Practices use Facebook, SEO, paid search, radio, TikTok, and Yelp. While Facebook provides 67% of marketing leads, only 16% convert. However, 25% of marketing leads come from organic search and nearly 50% of those leads convert. This high conversion rate speaks to a need for excellent online content, including a website.

Demand for specific services is linked to patient age. Teens and young adults are most likely candidates for wisdom teeth removal. Older patients may be seeking jaw reconstruction due to accidents or cancer. Adults may be looking for dental implants as well. While some oral surgery procedures are considered medically necessary and are covered by insurance, others, especially those deemed cosmetic, are not. Oral surgeons that offer financing packages may be able to attract more patients.

Opportunities+Challenges

The cosmetic dentistry market is projected to exceed $5.6 billion in 2026, with growth of approximately 6.4% annually from 2020 to 2025. Demand for aesthetic treatments including veneers, teeth whitening and smile enhancement continues to accelerate, particularly among younger generations and in wealthier urban areas.

Source: "Dental Health Statistics 2026: Trends, Habits, and Oral Care Insights." imagineyoursmile.com, 2026. Web. 16 Mar. 2026.

About 90% of dental practices report struggling with hiring staff despite a growing pipeline of dental hygienists. Growth in the supply of dentists has slowed due to increased retirement, and dental assistant hiring has a negative outlook due to mounting workforce challenges.

Source: "The Dental Workforce Trends That Will Dominate 2026." beckersdental.com, 2026. Web. 16 Mar. 2026.

To stay competitive, dentists and orthodontists are offering a variety of payment and financing options. This is especially attractive to patients seeking procedures not covered by insurance.

Source: SalesFuel, 2026.

The rise in overhead, otherwise known as rising costs, impacts profitability. Online bill pay, forms, scheduling, automated communications, and increased patient volume can help reduce overhead costs.

Source: Dentaleconomics.com, n.d. Web. 16 Mar. 2026.

Teledentistry is projected to account for 30% of all dental consultations in 2026, up from virtually nonexistent pre-pandemic usage. Virtual consultations expand geographic reach beyond traditional service areas, allowing practices to serve patients in rural communities and underserved areas where travel to physical offices is challenging.

Almost 90% of orthodontic patients requested whitening treatments, indicating strong complementary demand between orthodontic and cosmetic whitening services. This cross-selling opportunity drives revenue growth for dental practices offering both services.

Source: "Teeth Whitening Market Size, Share, Report, 2026-2034." fortunebusinessinsights.com, 2026. Web. 16 Mar. 2026.

Rising out-of-pocket costs and shifting insurance models have created a more price-sensitive patient base in 2026. Practices that fail to offer flexible payment options and transparent pricing are directly limiting their case acceptance rates and closing doors on viable patients.

Source: "2026 Dental Industry Outlook: How Practices Can Thrive Amid Change." JRC CPA, 2026. Web. 16 Mar. .2026.

Orthodontists are facing increasing competition from direct-to-consumer teeth straighteners, which bypass traditional consultations by delivering aligners directly to consumers' doors. This growing trend shifts the competitive landscape, and orthodontists must promote their own value and expertise over the convenience and lower cost of online DTC options.

Source: "Orthodontists in the US." IBISWorld.com, Sep. 2025. Web. 16 Mar. 2026.

Modern health care consumers are seeking comprehensive care delivered through a single platform with bundled services rather than juggling multiple providers and payment systems. This shift is driving dental practices toward subscription-based and all-in-one care models that reduce patient friction and introduce additional recurring revenue streams.

Purchase Consideration Cycle

The buying cycle for dental or orthodontic care typically involves several stages from a patient's viewpoint, including awareness of a need (e.g., routine check-up, pain, cosmetic desire), consideration of options (researching local providers, services offered, and insurance coverage), decision (choosing a provider and scheduling an appointment), and post-treatment (follow-up care, satisfaction assessment and possibly sharing experiences with others).

Top Advertising Media Used

DENTISTS

Non-digital tactics include:

- Direct Mail Marketing – Targeted postcards and every-door direct mail campaigns can generate strong response rates and help practices dominate local markets with consistent outreach.
- In-Person Marketing and Community Events – Sponsoring local activities, hosting educational events and volunteering builds trust and increases local brand awareness.
- Print Marketing Materials – Flyers and brochures support broader marketing efforts and can be distributed at events, waiting rooms and other local venues.
- Word-of-Mouth and Referral Programs – Incentivizing patient referrals remains a powerful way to attract new patients through trusted recommendations.
- Patient Testimonials and Reviews – Encouraging satisfied patients to share testimonials and reviews strengthens credibility and trust.
- Contests, Giveaways and Promotions – In-office events, prizes and promotions increase engagement and help capture new patient leads.
- Discount Offers and Membership Plans – Introductory discounts and subscription-style dental plans encourage first visits and long-term loyalty.

Digital tactics include:

- Google Maps and Local SEO Optimization – Google Maps visibility drives phone calls and patient inquiries, making Google Business Profile optimization, accurate business information and consistent listings across platforms essential.
- Google Ads and Pay-Per-Click Advertising – Targeted Google Ads campaigns match patient intent, use service-specific messaging and integrate call tracking to measure return on investment.
- Website Optimization and User Experience – Dental websites must load quickly, be mobile-friendly and include easy navigation and online appointment booking to convert visitors into patients.
- Online Reviews and Reputation Management – Positive reviews influence patient decisions and search rankings, making automated review requests and consistent responses essential.

- Social Media Marketing with Video Content – Platforms increasingly prioritize video, so practices share behind-the-scenes content, service highlights and community updates to boost engagement.
- Content Marketing and Blogging – Educational blogs and videos answer patient questions, improve search rankings and position practices as trusted experts.
- Email Marketing Campaigns – Automated email follow-ups support patient communication, increase engagement and encourage review submissions.
- Artificial Intelligence and Voice Search Optimization – AI tools automate tasks such as appointment scheduling and support voice search and generative search optimization.
- Direct Mail with Digital Integration – Modern direct mail includes QR codes that connect recipients to websites or online content, combining physical outreach with digital engagement.

Know the Customers

Target Customers

Dental practices typically maintain 1,300 to 1,500 active patients per dentist, with about 10% of patients leaving each year. To sustain growth, practices aim to add around 25 new patients per month per dentist while seeing 8 to 12 patients daily. Overall patient retention averages about 41%, making consistent acquisition and retention strategies essential.
[Source: "Average Dental Practice Revenue by Specialty: How Do You Compare?" curvedental.com, 17 May 2025. Web. 17 Mar. 2026.]

DENTISTRY PATIENTS

- 71% of U.S. adults visited a dentist in the past 12 months.
- 42% of dental visitors rate their health as “excellent” or “very good,” compared with 26% of non-visitors (+16 points).
- Dental visits by income:
  - Under $24,000: 46%
  - $24,000–$48,000: 57%
  - $48,000–$60,000: 67%
  - $60,000–$90,000: 70%
  - $90,000–$120,000: 76%
  - $120,000–$180,000: 82%
  - $180,000 or more: 86%
- Overall health rated “excellent” or “very good”:
  - U.S. adults: 42% vs. 26% (+16 points)
  - Less than $48,000: 30% vs. 20% (+10)
  - $48,000 to less than $90,000: 38% vs. 27% (+11)
  - $90,000 to less than $120,000: 43% vs. 26% (+17)
  - $120,000 to less than $180,000: 46% vs. 33% (+13)
  - $180,000 or more: 54% vs. 38% (+16)
- Life satisfaction (rated 7 to 10):

    - $120,000 to less than $180,000: 74% vs. 67% (+7)
    - $180,000 or more: 82% vs. 76% (+6)
- Felt active and productive each day:
    - U.S. adults: 48% vs. 33% (+15 points)
    - Less than $48,000: 36% vs. 25% (+11)
    - $48,000 to less than $90,000: 46% vs. 33% (+13)
    - $90,000 to less than $120,000: 48% vs. 38% (+10)
    - $120,000 to less than $180,000: 52% vs. 46% (+6)
    - $180,000 or more: 59% vs. 44% (+15)
- 76% of adults with a personal doctor visited a dentist, compared with 49% of those without one.
- 73% of nonsmokers visited a dentist, compared with 51% of smokers.

"Dentist Visits Predict Wellbeing Across Income Groups." gallup.com, 17 Jul. 2025. Web. 17 Mar. 2026.]

The CDC reports that more people are unable to afford dental care than other types of health care. Americans ages 41 to 60 years old are the most prevalent age group to need service from this industry. 21% of adults in the U.S. do not have dental insurance.

Note that:

- 63% of adults ages 18 and over visited a dentist.
- 40% of low-income adults ages 20 to 64 years old have an unmet need for dental treatment.
- 46% of adults 30 years old and over show signs of gum disease.
- Institutionalized/homebound older adults are vulnerable to oral disease due to lack of appropriate care

[Sources: Adult Oral Health.” CDC.gov, n.d. Web. 3 Apr. 2025; “Disparities in Oral Health.” CDC.gov, n.d. Web. 3 Apr. 2025; “Oral and Dental Health.” CDC.gov, n.d. Web. 3 Apr. 2025; Cortigiano, Cameron. "One-fifth of adults lack dental coverage: 6 notes." BeckersDental.com, 3 Oct. 2024. Web. 4 Apr. 2025; "Oral Health in America.” NIDCR.NIH.gov, n.d. Web. 3 Apr. 2025.]

One in three Americans aged 50-64 feel ashamed of their teeth, with 38% experiencing pain or difficulty eating due to dental issues. Additionally, one in six individuals over 65 are missing all their teeth.
[Source: "More than a Third of the US has Dental Anxiety. Here's How New Technology is Improving Patient Trust." Medcitynews.com, 8 Dec. 2024. Web. 7 2025.]

CHILDREN

The American Academy of Pediatric Dentistry recommends that children be evaluated by a dental professional before they are 12 months of age, while the American Academy of Pediatrics recommends that children receive an oral health screening from their primary care provider by six months of age.

The provision of preventive dental care within a pediatrician's practice has enhanced access to oral health care for children. Adults could also benefit from a similar approach; wherein oral health assessments and preventive care are offered in a primary health care setting rather than exclusively in a dental office.

75% of parents bring their children to the dentist for check-ups at least twice a year.

42% of children ages 2 to 11 have at least one untreated decayed tooth.
[Sources: "Children's Oral Health: CDC.gov, n.d., Web. 4 Apr. 2025.; Dental Caries (Tooth Decay) in Children Age 2 to 11." Nidcr.nih.gov, n.d., Web. 4 Apr. 2025.; "VideaHealth Delivers 80% Improvement in True Pediatric Caries Identification." Dentistrytoday.com, 9 Feb. 2024. Web. 4 Apr. 2025.]

PERIODONTAL DISEASE

Approximately 47.2% of U.S. adults aged 30 years or older have some form of periodontal disease. The disease progresses with age, as approximately 70.1% of those ages 65 and over have it. This disease is particularly prominent among men and current smokers.
[Sources: "Periodontal Disease." CDC.gov, n.d. Web. 5 Apr. 2025.]

DENTAL ANXIETY

Note that dental anxiety affects 36% of U.S. adults, leading to missed appointments and poor oral health. With 40 million Americans avoiding dental visits yearly, anxiety increases the risk of decay, gum disease and tooth loss. But advances in dental technology are helping reduce fear and improve care. Dentists should market any offerings they have that may alleviate patient anxiety. Doctors can reduce mistrust by

explaining the process, addressing concerns, and offering solutions. This helps patients feel involved in their treatment.
[Source: "More than a Third of the US has Dental Anxiety. Here's How New Technology is Improving Patient Trust." Medcitynews.com, 8 Dec. 2024. Web. 7 2025.]

ORTHODONTICS

Children are typically the target market for these services, with the first consultation typically occurring between the ages of 7 and 13.

Adults have increasingly been seeking these services, and demand is expected to continue. Specifically, treatment among males has grown quickly.

The increase in demand for braces among adults can be attributed to several factors, including easier access to orthodontic care with no referral required, low-cost or free initial consultations, and financial options like dental insurance and Flexible Spending Accounts (FSAs) that help offset treatment costs. Additionally, the introduction of clear aligners and lingual treatment makes these services more attractive to adults who otherwise would have been self-conscious with traditional bracket and wire treatments.
[Sources: Dentaltribune.com, n.d; Stosichconsulting.com, n.d.]

Target Customers by Mile Radius

Most customers are drawn from a 30 mile radius. [Sources: "New Study Maps the 'Dental Deserts' in the U.S." harvard.edu, 2025. Web. 11 Nov. 2025; "Travel Time for Dental Care Services Based on Patient Preference." jada.ada.org, 2025. Web. 11 Nov. 2025; "Dental Clinic Deserts in the US: Spatial Accessibility Analysis." pmrjournal.org, 2025. Web. 11 Nov. 2025.]

Top Factors People Consider When Choosing This Type Of Account

GENERAL DENTISTRY

- Patient-centered care: Patients prioritize dentists and orthodontists who provide personalized care, involve them in decision-making, and tailor treatment to individual needs.
- Convenience and accessibility: Location and appointment availability matter. Online booking, flexible scheduling and minimal wait times influence selection, especially for younger adults and working professionals.
- Insurance and affordability: Acceptance of insurance, clear cost estimates, and flexible payment plans are important, particularly for value-conscious patients and families considering pediatric dentistry or orthodontics.
- Professional qualifications: Provider credentials, adherence to evidence-based standards, and use of modern diagnostics build trust and influence patient choice. Updated 2025 clinical standards allow practices to highlight these differentiators.
- Online reputation: 71% of patients research providers online before booking. High ratings, positive reviews, testimonials, and social media engagement strongly affect patient decisions.

The American Dental Association encourages consumers to consider the following when selecting a dentist:

- Convenience of scheduling
- Accessible locations
- Clean and orderly office environment

Consumers have fears about visiting dentists. Address these fears in advertising. More adults are looking to dentists for aligners.
[Sources: SalesFuel, 2025.; "Dentists in the U.S." IBISWorld.com, Mar. 2025. Web. 3 Apr. 2025.]

ORTHODONTISTS

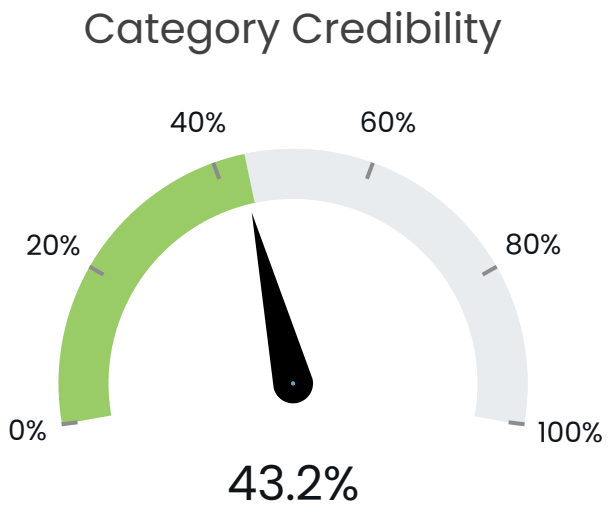

Consumers will select a specific orthodontist based on whether any of the services are covered by insurance, the total cost of service, availability of payment plans, and the willingness of providers to negotiate. Orthodontists are perceived as better at identifying and managing complications and delivering reliable results compared to general dentists offering similar services. However, orthodontic care provided by general dentists is preferred for its convenience and the established relationships they have with patients.

A study found that orthodontic care for children was most often initiated in response to a suggestion from the family dentist, while adults were slightly more likely to make a decision for care themselves and for appearance reasons.

Orthodontists were seen as being better at identifying complications, managing complications, and delivering reliable results. Orthodontic care provided by general dentists was favored for convenience and based on established relationships.

Category Trust+Credibility

> *43.2% of U.S. Adults believe the marketing practices of dentists and orthodontists are credible*

	Audience	All Respondents	Difference
65+	**29.5%**	21.6%	**+37%**
45-54	16.1%	15.8%	+2%
55-64	18.1%	18.5%	-2%
18-24	8.6%	9.6%	-10%
35-44	15.5%	18.2%	-15%
25-34	12.3%	16.6%	-26%

"More likely" or "less likely" than the average U.S. adult 18+.

Credibility - and whether a person has it or not - determines who you trust for guidance and information you use to make decisions in your everyday life. The four components of credibility for any human being are (1) being known, (2) being likable, (3) being helpful, and (4) being trustworthy. Credibility is gained (or lost) by what one says, how they say it, what they do and, finally, what others say about them. Having credibility also requires having others' best interests at heart.

Trust Drivers

56.8% of U.S. adults **do not indicate a belief that the marketing** of dentists and orthodontists is credible. The following responses are from this audience of consumers.

> *What are the best ways for a company to demonstrate their credibility, trustworthiness and value through their marketing practices?*

Marketing Practice	Audience
Being transparent about what their product or service can and cannot do	60.1%
Showing real customers and authentic experiences rather than overly polished or staged advertising	58.6%
Making pricing, fees and terms easy to find without having to dig for them	51.1%
Clearly disclosing when their content is sponsored, paid or AI-generated	42.4%
Responding publicly and personally to negative reviews rather than ignoring them	40.8%
Showing the real people behind the business rather than hiding behind a brand	34.2%
Being visibly involved in and giving back to their community	32.7%
Being findable and well-represented across Google, AI search and review platforms	22.9%
Displaying third-party recognition such as industry awards, certifications, accreditations, or media coverage	17.2%
Emailing, calling and/or texting me less often	16.9%

> *How do you tell if a company you've never heard of before is legitimate?*

Vetting Method	Audience
I search for them on Google or another search engine.	51.7%
I look for reviews on sites like Yelp, Trustpilot or Google Reviews.	46.3%
I ask friends, family or colleagues if they've heard of them.	41.2%
I check their Better Business Bureau rating or complaints.	37%
I ask myself if the offer seems too good to be true.	36%
I check for their professional-looking website with a physical address and phone number.	32.6%
I look for industry certifications, association memberships or if they're licensed in my state.	31.3%
If I have any doubts, I simply move on and look for someone else.	30%
I check their social media presence to see how active, responsive and authentic they are.	26.2%
I search for them on an AI assistant like ChatGPT.	15.1%
