Drugstores/Pharmacies

Includes category intelligence for pharmacies and retailers of over-the-counter drugs, health/beauty aids, and general merchandise; specialty pharmacies, compound pharmacies.

Industry Background

Primary NAICS Code: *446110*
Pharmacies and Drug Stores

Primary SIC Code: *5122*
Drugs, Drug Proprietaries, and Druggists' Sundries (drugs and sundries sold via retail method)

Industry Intel

These businesses offer pharmacy services along with other consumer goods ranging from health and beauty supplies to seasonal goods and packaged groceries. Since 2004, some drug stores have begun to offer in-store quick medical clinics where consumers can be tested for simple medical problems such as ear infections and then obtain a prescription for medicine.

Note that drugstores don't have total control of this market. Retailers that fill prescriptions also compete with grocery stores and mass merchandisers. In addition, online and by mail competitors have moved into this market. In recent years, these retailers are also feeling profit pressure because of new legislation regarding Medicare prescription drug coverage.

The outlook for pharmacists is good, however, as the delivery methods of prescription drugs change, drug stores will have to compete to maintain their business base.

The drugstore and pharmacy industry includes approximately 41,255 businesses that generate revenue of $609.6 billion. Specifically, there are approximately 18,984 independent pharmacies across the country. In 2024, independent pharmacies in the United States represented approximately 35% of all retail pharmacies. Industry professionals estimate that independent pharmacies are worth approximately $94.9 billion.

There are about 20,200 traditional chain pharmacy practices, 9,400 supermarkets and 7,300 mass merchant pharmacy practice settings in 2024 in the U.S.

Superstores (such as large grocery stores and mass retailers) are permitted to operate pharmacies within their premises because there are no federal laws in the United States that prohibit this arrangement. Pharmacy operations are primarily regulated at the state level, and as long as a superstore meets all state licensing

requirements, complies with federal and state pharmacy laws, and employs licensed pharmacists, it can legally operate a pharmacy department.

Establishment+Employment Count

There are estimated to be 1,286 companies of this type (*Pharmacies & drug stores*) in the state of Minnesota employing approximately 18,229 people.
[Source: 2025 EASI Demographics]

Items commonly offered by Drugstores/Pharmacies

- Drive-thru/Curbside pickup
- In-store health clinic
- Loyalty program
- Disease management programs
- All insurance accepted
- Prescription delivery service
- Online refill submission
- Open 24/7
- Seasonal decorating supplies
- Mobile app

Related Industries

COMPOUND PHARMACIES

Compound pharmacies provide drugs that are custom-made by pharmacists rather than produced by pharmaceutical companies. The compounding industry accounts for approximately 1% to 3% of the U.S. prescription market.

A growing number of physicians, veterinarians, surgeons, and other medical professionals are turning to compound pharmacies for a variety of reasons, including:

- The ability to offer tailor-made drugs specific to a patient's needs and wants
- The ability to offer drugs that have since been discontinued by the manufacturer

Because compound pharmacies create drugs for a variety of medical issues, ranging from women's health to sports medicine and analgesics, they have filled a lucrative niche in the pharmacy industry.

Note also that a shortage of anesthesia drugs has boosted business for these pharmacies.

Drugstores/Pharmacies Put Diabetes Awareness Front and Center in November

In November, drug stores will be observing American Diabetes Month. Around 12%, diagnosed and undiagnosed, of the U.S. population is living with the challenges of this chronic disease. Drugstores can run educational campaigns about healthy lifestyles to reduce the impact of diabetes. In addition, they can advertise products designed to ease symptoms. If your account carries Juzo products, they may qualify for 50% advertising cost reimbursement when they follow the guidelines of this vendor's co-op advertising program. The vendor's specialty stockings can help diabetic patients protect their feet against injury.

Online shopping for pharmacy needs is accelerating, especially among younger generations. Nearly 30% of consumers plan to increase their online pharmacy purchases in the next year.

Source: "Retail Pharmacy Trends for 2025." Shiftposts.com, 14 Jan. 2025. Web. April 2025.

Mail-order pharmacies are seeing higher satisfaction, driven by convenience and reliability, while brick-and-mortar stores struggle with long wait times and fulfillment issues.

Sources: "As Mail Order Pharmacies Continue to Climb in Customer Satisfaction, Chain Drug Stores Fall Behind, J.D. Power Finds." Jdpower.com, 20 July 2024. Web. April 2025.; "Amazon plots big expansion of pharmacy business, adding same-day delivery in 20 cities next year." Fiercehealthcare.com, 9 Oct. 2024. Web. April 2025.

Digital pharmacies must improve their online experience; only 18% of mail-order customers rate their pharmacy's digital experience as well-designed. Confusion about insurance compatibility and digital pharmacy processes remains a barrier to wider adoption.

Source: "As Mail Order Pharmacies Continue to Climb in Customer Satisfaction, Chain Drug Stores Fall Behind, J.D. Power Finds." Jdpower.com, 20 July 2024. Web. April 2025.

Polypharmacy (use of multiple medications) is rising, increasing the risk of adverse drug interactions and creating demand for better medication management and deprescribing programs.

Source: "The Shifting Pharmacy Landscape in 2025." PharmExec.com, 13 Feb. 2025. Web. April 2025.

Ongoing drug shortages and pharmacy closures are a major concern. About 16 million Americans now live in “pharmacy deserts,” with limited or no access to local pharmacies. 59% of Americans fear losing access to nearby pharmacies due to closures.

Drug stores are rapidly integrating digital platforms to create hybrid shopping experiences. Customers can now order prescriptions and health products online, then choose between in-store pickup, curbside service or home delivery. This omnichannel approach is designed to meet consumer expectations for convenience and flexibility, blending the strengths of both online and physical retail.

expectations for convenience and flexibility, blending the strengths of both online and physical retail. Source: "The New Era of Pharmacy Retail: Innovations, Trends, and Consumer Impact." Market-excel.com, 13 June 2024. Web. April 2025.

The industry faces persistent staffing shortages, with high stress and burnout among pharmacists, leading to reduced hours and more closures.

Peak Interest Months

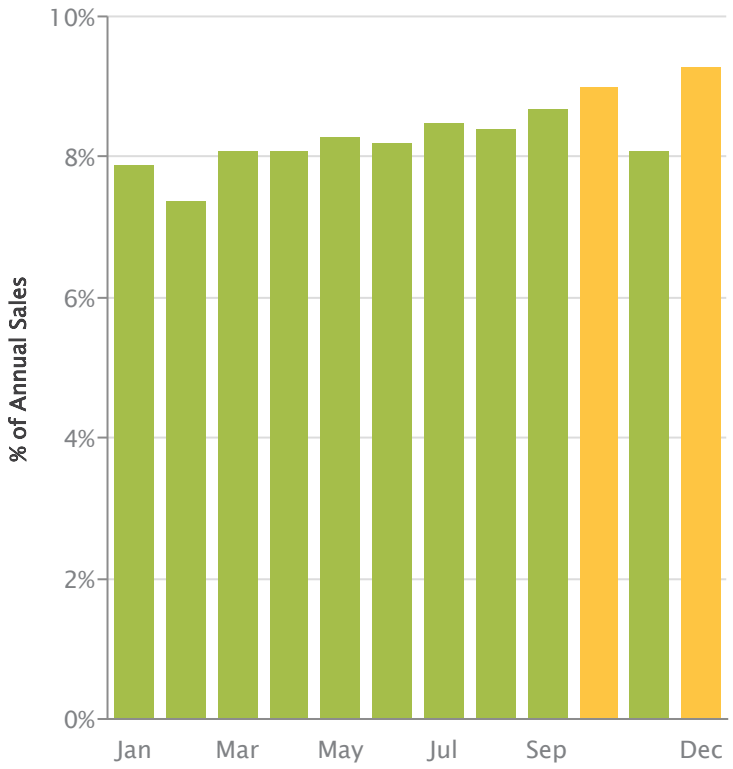

Graph displays the trend line of search volume for this industry over the last 12 months. Source: DataforSEO November 02, 2026

Average Sales Per Location/Employee

The average annual sales per location for pharmacies & drug stores is **$3,487,596** in the state of Minnesota. **$246,039** per employee in the state of Minnesota.

Peak Sales Months/Seasons

Calendar Month	% of Annual Sales
January	7.9%
February	7.4%
March	8.1%
April	8.1%
May	8.3%

Calendar Month	% of Annual Sales
June	8.2%
July	8.5%
August	8.4%
September	8.7%
October	9.0%
November	8.1%
December	9.3%

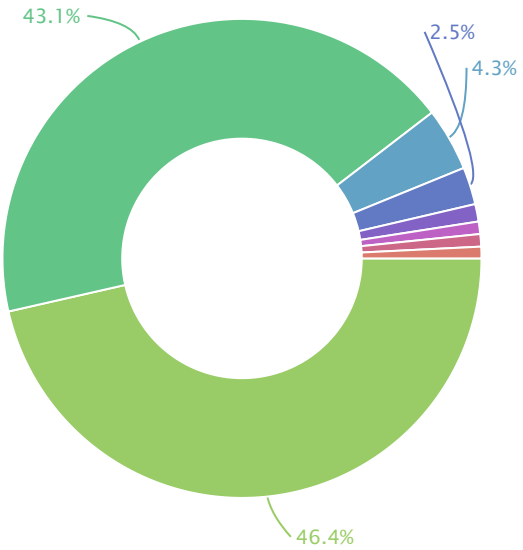

In 2025, sales were highest in October and December for drug stores and pharmacies.

December is the traditional holiday gift season, and the higher revenue in this month may also indicate consumers are purchasing medication for the upcoming cold season.

Note also that October is "Talk About Prescriptions" Month, sponsored by the National Council on Patient Information and Education. Top Product Categories

Based on sales data from 581 Pharmacies and Drug Stores in Minnesota, compiled by the U.S. Census Bureau's latest Economic Census, these include...

Merchandise Line	% of Sales
Retail sales of medicines, vitamins, minerals, and supplements	82.9%
Retail sales of prescriptions	77.0%
Retail sales of other goods, not elsewhere classified	7.6%
Retail sales of nonprescription medicines	4.5%
Retail sales of personal hygiene supplies	2.1%

Merchandise Line	% of Sales
Retail sales of vitamins, minerals, and other dietary supplements	1.5%
Retail sales of cosmetics and fragrances	1.5%
Retail sales of tobacco products and smoking accessories	1.4%

[Source: US Census Economic Census]

Sales % reflect NAPCS collection code sales, value of shipments, or revenue as % of total sales, value of shipments, or revenue of establishments as reported by the US Census and often will not total 100 for all products. When sales % values in the table to not sum to 100, values will be adjusted in the pie chart to reflect a sum of 100%.

Annual Advertising/Marketing Budget

Approximately **0.29%** of retail sales - retail-drug stores and proprietary stores
[Source:" Ad to Sales Ratios." Schonfeld & Associates, 2026.]
This amounts to an estimated ad budget of **$11,509** per location for average size pharmacies & drug stores in the state of Minnesota. To be average in this market, pharmacies & drug stores need to spend **$812** per employee on advertising every year. In the state of Minnesota there is an estimated **$14,800,662** in ad revenue.

Top Advertising Media Used

Digital advertising is expected to be the primary channel for pharmacy and pharma marketing by 2025, including search engine marketing (SEM), social media campaigns and targeted display/video ads.

Social media remains essential, but regulatory scrutiny is increasing. New legislation may tighten rules on influencer marketing, and platforms like TikTok could face bans or restrictions, impacting reach in 2025.

Video and interactive content are especially effective, with consumers favoring educational, testimonial, and immersive formats. Video ads on platforms like YouTube, connected TV, and social feeds drive engagement and information retention.

Email marketing remains a cost-effective and high-ROI channel, especially when personalized and segmented based on purchase history and interests. Pharmacies use email to share health tips, promotions, and product updates, driving both online and in-store traffic.

Optimizing online presence through local SEO, Google My Business and mobile-friendly websites ensure discoverability when consumers search for pharmacy services.

Know the Customers

Target Customers

The primary age demographic for U.S. drug store/pharmacy customers is adults aged 18–64, with particularly strong engagement from younger adults and parents. Gender representation is balanced, though women are more likely to purchase beauty and wellness products, and men are more likely to buy food and beverages at these stores.

The aging population, especially those managing chronic illnesses, remains a core audience. This group requires regular prescriptions, pharmacist-led care and values personal attention and reliable service.

Consumers interested in holistic health, wellness products and preventive care—such as vitamins, supplements and screenings—are a growing segment, especially among younger and middle-aged adults.

Pmc.ncbi.nlm.nih.gov, 28 Jan. 2025. Web. April 2025.; “Over Half of U.S. Population Concerned About Prescription Drug Access, Prices.” Drugtopics.com, 19 Nov. 2024. Web. April 2025.]

Target Customers by Mile Radius

Most customers are drawn from a 2 mile radius.

In urban pharmacy deserts, customers may need to travel more than one mile or spend over 15 minutes driving to reach a pharmacy. Suburban pharmacy deserts are often defined by a distance of more than two miles to the nearest pharmacy. Rural pharmacy deserts are defined as areas where the nearest pharmacy is more than 10 miles away. In practice, rural residents in pharmacy desert counties average round-trip travel distances of 36 miles (about 18 miles one way) and spend approximately 85 minutes traveling to and from a pharmacy.

Top Factors People Consider When Choosing This Type Of Account

Top competitive factors for this industry include:

- Selected insurance coverage
- Proximity to home or office
- Service quality
- Store hours
- Less expensive prescription medications
- Convenience
- Production selection/variety
- Credentials

Most U.S. pharmacy customers are familiar with traditional pharmacy services. According to a recent Rite Aid survey, 72% are aware of medication dispensing, 64% know about over-the-counter product guidance, 53% are aware of health and wellness advice, and 53% know about immunizations.

Awareness drops significantly for nontraditional or expanded services. Only 30% know pharmacists can prescribe certain medications (in select states), 27% are aware of medication therapy management, 23% know about point-of-care testing, and 24% are aware of smoking cessation programs.

55% believe pharmacists can assist with minor health concerns, but only about half of those taking medications discuss potential interactions or adverse events with their pharmacist.

Individuals managing long-term health issues need ongoing medication management and are increasingly looking for comprehensive care and adherence support from pharmacies.

With inflation and rising healthcare costs, a significant segment of shoppers is highly price-sensitive, seeking competitive pricing, discounts, and affordable private label products.

62% of individuals view pharmacists as a crucial part of their health and wellness care team, and 81% trust pharmacists, nurses, or nurse practitioners to diagnose minor illnesses and prescribe medications.

Younger generations expect on-demand, tech-enabled healthcare, including online ordering, telehealth and digital pharmacy services. They are open to pharmacist-prescribed medications and value convenience and speed.
