Apartments | Google Search

RESULTS OVER 4 MONTHS:

180%
Increase in Conversions

53%
Reduction in Cost-per-lead

330%
Increase in calls

32%
Increase in budget

CAMPAIGN GOAL:

Generate quality leads while decreasing CPA.

CHALLENGE:

Audit previous campaign performance in order to restructure and improve the strategy.

SOLUTIONS:

In auditing the account we identified 5 primary areas of opportunities:

1. Google My Business Location Extensions: Update campaigns to include location extensions which allowed for better geo-targeting and more accurate automated bid adjustments.

2. Audience: Created prospecting and retargeting campaigns to differentiate audiences. The prospecting campaign utilized Google In-Market Audiences with expressed interests in apartment related areas.

3.Dayparting: Apply day parting in order to maximize daily budget and measure performance by time/day.

4.Keyword Strategy: Keyword management was an area that needed vast improvement. There were a host of opportunities for keyword expansion for lower funnel and longer tail keywords that drew more results at a lower CPC. In addition, analysis discovered vast amounts of poor performing keywords that were ultimately wasting spend, therefore use of negative keywords to address issue.

5. Campaign & Bid strategy: With phone calls being a lead driver, campaigns were optimized to accelerated bid management. Campaigns were also refined to maximize conversions.
