IMPROVEMENT IN ROI

Challenges	Solutions
Building brand awareness as a new dealership in a competitive market	Increased visibility with OTT, display, video, and dynamic ads
Lack of advanced analytics to guide data-driven decisions	VLAs, ad groups, and competitor targeting to boost performance
Inefficiencies from managing multiple vendors/agencies	Unified vendors and leveraged Adtaxi's market research to create a tailored strategy

KEY INSIGHTS

By combining sales expertise with data-driven insights, we turned routine reporting into strategic, action-focused sessions. This empowered seamless client communication, allowing us to predict inventory trends, tackle emerging challenges, and adapt to a competitive automotive market. Our precise targeting expanded the dealership's reach, boosted used inventory sales, and attracted multilingual buyers from Seattle to the suburbs. This resulted in record-breaking sales months and a proven strategy for new dealerships to overcome industry competition.

We raised the benchmark for agency performance, setting new client expectations for data-driven strategies and innovative solutions. Our results raised the stakes among competing vendors, with some agencies falling short and being phased out. Ultimately, the dealership allocated its budget to Adtaxi, as we consistently delivered measurable results and value.

THE FULL STORY

How Marysville Toyota became a top performer

A new dealership in the Washington area faced significant challenges in gaining visibility in a saturated market dominated by established competitors. Their efforts were further hindered by fragmented campaigns managed by multiple vendors and agencies, and a lack of actionable analytics to guide performance improvements. Seeking a game-changing strategy, the dealership partnered with Adtaxi to create a unified, data-driven digital marketing approach designed to help them stand out.

Our tailored solution began with prioritizing Vehicle Listing Ads (VLAs), high-value ad groups, and competitor targeting to drive immediate impact. To amplify visibility, we integrated over-the-top (OTT), display, and pre-roll video campaigns while deploying dynamic inventory and collection ads to maximize engagement. Organic search strategies were refined to enhance rankings, and we streamlined reporting by unifying vendors and agencies to foster collaboration. Notably, this approach extended into Spanish-language marketing to broaden their audience reach, and also factored into widening the geographic targeting to increase sales for used and certified pre-owned (CPO) vehicles.

Leveraging customer relationship management (CRM) data, pump-in and pump-out reports, regional sales trends, and real-time search volume analysis, we fine-tuned targeting to directly compete with both same-brand and off-brand manufacturer dealerships in the region. This targeted conquest strategy allowed for laser-focused competition while ensuring maximum return on investment (ROI).

The dealership achieved year-over-year (YoY) sales growth across new, used, and certified pre-owned categories, captured greater market share, and increased branded search activity. Our streamlined reporting approach unified marketing efforts, delivering seamless collaboration and actionable insights. This cohesive strategy enhanced performance, earning the client a prestigious industry award

and helping to position them as a standout performer in their market.

Marysville Toyota, a new dealership in the competitive Washington market, faced the tough challenge of standing out against well-established competitors. Their efforts were further complicated by disjointed marketing campaigns managed by multiple vendors and a lack of robust analytics to measure and optimize performance. Recognizing the need for a transformative solution, the dealership turned to Adtaxi. We developed a cohesive, data-driven digital marketing strategy designed to cut through the noise and elevate their presence in a crowded marketplace.

A well-defined focus on Tier 3 messaging has been the driving force behind this account's outstanding performance, emphasizing what sets this dealership apart from other Toyota stores. By implementing a robust omnichannel strategy, the campaign seamlessly guided consumers through the car-buying journey, establishing Marysville Toyota as the go-to destination for an exceptional experience. OTT and pre-roll video ads spotlighted glowing customer reviews, the dealership's streamlined sales process, and competitive monthly lease offers. Meanwhile, paid social campaigns utilized collection ads to showcase high-priority and best-selling models, while dynamic inventory ads efficiently directed consumers to vehicle detail pages (VDPs), ensuring a comprehensive and engaging digital customer experience.

By utilizing display ads, we've reinforced the client's promise to simplify the car-buying process, seamlessly aligning with their unique branding and customer-centric sales approach.

VLAs have proven to be the top performer in driving inbound calls, while targeted paid search campaigns for high-priority inventory ensure we remain competitive for best-selling models. Additionally, this innovative strategy seamlessly integrates Spanish-language marketing, amplifying the dealership's audience reach while driving measurable success in used and CPO vehicle sales.

By leveraging CRM insights, pump-in and pump-out reports, regional sales data, and real-time search volume trends, we have meticulously refined the targeting strategy. This approach allowed us to effectively outperform competing Toyota dealerships and off-brand models, demonstrating a data-driven mastery of market dynamics and digital precision.

Our innovative digital strategies drove significant results, increasing Marysville Toyota's market share and branded searches by 22%. YoY sales also saw impressive growth of 41% across new, used, and certified pre-owned vehicles. Through strategic collaboration and seamless marketing alignment, we delivered actionable, data-driven insights that boosted ROI by 120%.

Adtaxi's efforts transformed this new dealership into a top performer, contributing to it earning the prestigious 2024 President's Award. Notably, they were the only Seattle metro dealership to receive this honor, underscoring the effectiveness of strategic data-powered, customer-centric marketing solutions for new dealerships.
